Psychopharmacology Abstracts, 1979 **Converging Clinical and Engineering Research on Neurorehabilitation II** Jaime Ibáñez, José González-Vargas, José María Azorín, Metin Akay, José Luis Pons, 2016-10-12 The book reports on advanced topics in the areas of neurorehabilitation research and practice It focuses on new methods for interfacing the human nervous system with electronic and mechatronic systems to restore or compensate impaired neural functions Importantly the book merges different perspectives such as the clinical neurophysiological and bioengineering ones to promote feed and encourage collaborations between clinicians neuroscientists and engineers Based on the 2016 International Conference on Neurorehabilitation ICNR 2016 held on October 18-21 2016 in Segovia Spain this book covers various aspects of neurorehabilitation research and practice including new insights into biomechanics brain physiology

neuroplasticity and brain damages and diseases as well as innovative methods and technologies for studying and or recovering brain function from data mining to interface technologies and neuroprosthetics In this way it offers a concise yet comprehensive reference guide to neurosurgeons rehabilitation physicians neurologists and bioengineers Moreover by highlighting current challenges in understanding brain diseases as well as in the available technologies and their implementation the book is also expected to foster new collaborations between the different groups thus stimulating new ideas and research directions

Brain Gender Melissa Hines,2005-04-14 Do biological factors such as gonadal hormones determine our sexual destiny after our genes are in place Do they make men aggressive or women nurturing Do they cause boys and girls to play differently or to have different interests Do they explain differences in sexual orientation within each sex group Do they contribute to the preponderance of men in science or women at home Scientists working from a psychosocial perspective would answer these questions differently than those working from a behavioral neuroscience or neuroendocrinological perspective This book brings both of these perspectives to bear on the questions tracing the factors that influence the brain beginning with testosterone and other hormones during prenatal life and continuing through changing life situations and experiences that can sculpt the brain and its activity even in adulthood This influence has important implications for understanding the social roles of men and women in society the different educational and emotional issues that confront males and females the legal rights of those whose sexual orientation or gender identity do not correspond to norms and even standards of clinical care for people born with physical intersex conditions that make it difficult to classify a person as male or female at birth This original and accessible book will be of interest to psychologists neuroscientists pediatricians and educators as well as the general public It is also suitable for use in graduate and undergraduate courses on the psychology of gender or on hormones and behavior
