Bureau of Naval Personnel, 1969 **The Army Communicator** , 1988 **More Than Words** Richard Dimbleby, Graeme Burton, 1992 More Than Words provides an introduction to both communication theory and practice The authors cover the basics of communication including communication between individuals between groups in organizations and through the mass media and new technologies The book provides a structured approach to the subject and a source of reference with examples of the application of ideas short practical activities resource lists and a glossary of terms The second edition has been fully revised and updated to take into account new developments in communication and media studies it contains an expanded section on practical communication and media skills writing skills designing leaflets and producing audio and video material including scripting and planning It is illustrated with new models and photographs and has checklist summaries for easy revision purposes *The SAGE Handbook of Communication and Instruction* Deanna L. Fassett, John T. Warren, 2010-03-18 As the only multi paradigmatic collection of research in the field this Handbook brings together a comprehensive range of essays to serve as a fully inclusive resource Deanna L Fassett and John T Warren along with two section editors and twenty nine additional contributors provide a balanced overview of various paradigms in the field social scientific interpretive and critical Key Features Three sections addressing overlapping issues in communication and instruction collectively represent multiple paradigms This allows the reader to experience the depth and nuance available in communications studies Each perspective is granted its own foundational chapter to provide an orientation to the discipline Each contributor sets the agenda for their approach helping the reader identify where the field is headed and where future research might be beneficial Besides reviews of extant literature demonstrating where the field has been this Handbook also includes chapters that share topical new findings SECTION I Communication Education Ann Darling Section Editor SECTION II Instructional Communication Scott A Myers Section Editor SECTION III Critical Communication Pedagogy John T Warren and Deanna L Fassett Section Editors This Handbook will benefit scholars graduate students and general readers irrespective of method or disciplinary background who are interested in the connections between communication and instruction *More Than Words* Graeme Burton, Richard Dimbleby, 2002-09-11 The authors cover the essential elements of communication including communication between individuals and groups in organizations and through mass media and new technologies **List of Training Manuals and Correspondence Courses** United States. Naval Education and Training Command, 1968-06 *Resources in Education* , 2000-10 Introduction to Sonar United States. Bureau of Naval

Personnel,1968 Fundamentals of sonar systems are presented in this book prepared for both regular navy and naval reserve personnel who are seeking advancement in rating An introductory description is first made of submarines and antisubmarine units Determination of underwater targets is analyzed from the background of true and relative bearings true and relative motion and computation of target angles Then applications of both active and passive sonars are explained in connection with bathythermographs fathometers tape recorders fire control techniques internal and external communications systems maintenance actions test methods and equipment and safety precautions Basic principles of sound and temperature effects on wave propagation are also discussed Illustrations for explanation use information on training films and the sonar technician rating structure are also provided **by United States. Introduction to sonar** United States. Bureau of Naval Personnel,2018-09-29

SONAR sound navigation and ranging systems have many similarities to RADAR and electro optical systems Again detection is based on the propagation of waves between the target and detector There are active sonar systems where the wave propagates from the transmitter to the target and back to the receiver analogous to pulse echo radar There are also passive sonar systems where the target is the source of the energy which propagates to the receiver analogous to passive infrared detection Therefore a great deal of what has been discussed about these systems will also apply to sonar Sonar however differs fundamentally from radar and electro optics because the energy is transferred by acoustics waves propagating in water So we first begin by discussing the characteristics of acoustic waves **Instructional**
