### **Intro To American Studies 3ed:**

Early Visions and Representations of America M. Carmen Gomez-Galisteo, 2012-11-22 When the Europeans first arrived in America they had a number of preconceptions prejudices expectations and hopes about what life in the New World would be like This book examines the different visions and representations of America conveyed in the writings of Spanish conquistador lvar N ez Cabeza de Vaca and the Pilgrim leader William Bradford taking both writers within their respective literary and historical contexts Anthologies of American literature have consistently ignored Spanish language achievements on the grounds of a restrictive interpretation of American literature based on linguistic boundaries Consequently Spanish language texts such as Cabeza de Vaca s or the account by the Hidalgo de Elvas to name but two examples have been marginalized in the narrative of American literary history In seeking to redress this neglect Galisteo contributes to scholarship which seeks to analyze Early America as a whole including not only Anglo American perspectives but also the Spanish American aspect of the colonization process

*Beyond the Boundaries* Georgia A. Persons,2017-09-29 In the past African American aspirations for political offi ce were assumed to be limited to areas with sizeable black population bases By and large black candidates have rarely been successful in statewide or national elections This has been attributed to several factors limited resources available to African American candidates or identifi cation with a black liberationist ideological thrust Other factors have been a relatively small and spatially concentrated primary support base of black voters and the persistent resistance of many white voters to support black candidates For these reasons the possibility of black candidates winning elections to national offi ce was presumably just a dream Conventional wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective offi ce to which they could ascend But objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions Th e contributors to this volume explore the ways ambitious individuals identifi ed and seized upon strategies that are expanding the boundaries of African American electoral politics This volume is anchored by a symposium that focuses on new possibiities in African American politics Both the electoral contests of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in American electoral politics Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and dimensions of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates Bulletin University of Georgia,1929
