**You are expected to answer one (1) from this part.**  
 List two (2) benefits of factorial design of experiment over the traditional approach.

(b)

List four (4) ways of assessing a model accuracy and also briefly discuss how to use it.

2 (a)

Give one (1) merit and one (1) demerits that fractional factorial has over the full factorial design of experiment.

(b)

(I) When a 5 by 2 factorial design is used in an experiment, give the number of factors, number of levels, and experimental runs that would be needed.

(II) Using 3 by 2 factorial design, manually sketch out its design matrix template, using any letters to reference the factors.

**Part B**

*Experimentation in Software Engineering* Claes Wohlin, Per Runeson, Martin Höst, Magnus C. Ohlsson, Björn Regnell, Anders Wesslén, 2012-12-06 It is my belief that software engineers not only need to know software engineering methods and processes but that they also should know how to assess them Consequently I have taught principles of experimentation and empirical studies as part of the software engineering curriculum Until now this meant selecting a text from another discipline usually psychology and augmenting it with journal or conference papers that provide students with software engineering examples of experiments and empirical studies This book fills an important gap in the software engineering literature it provides a concise comprehensive look at an important aspect of software engineering experimental analysis of how well software engineering methods methodologies and processes work Since all of these change so rapidly in our field it is important to know how to evaluate new ones This book teaches how to go about doing this and thus is valuable not only for the software engineering student but also for the practicing software engineering professional who will be able to Evaluate software engineering techniques Determine the value or lack thereof of claims made about a software engineering method or process in published studies Finally this book serves as a valuable resource for the software engineering researcher
