*A Comprehensive Textbook Of Physical Pharmaceutics* Dr. Tejas Shivram

Pachpute, Mr. Sudarshan Nandkumar Borkar, Dr. Ajay Madhukar Deshpande, Mr. Kishor Arvind Kothawade, 2024-02-16 This book aims to offer students and professionals in the area of pharmacy and associated subjects a comprehensive grasp of physical principles that underlie the formulation of pharmaceuticals and the administration of drugs. Physical pharmaceutics is a subfield of the pharmaceutical sciences that focuses on the application of the fundamentals of physics and chemistry to the formulation, manufacture and assessment of various dosage forms used in the pharmaceutical industry. It covers a broad variety of subjects including solubility, diffusion, rheology and interfacial phenomena, all of which are very important in the process of developing pharmaceutical products and ensuring their effectiveness. In this textbook, the goal is to address these subjects in a way that is both clear and organized. Also have presented the basic ideas and principles associated with the discipline along with practical applications and examples from the field. A general introduction to the subject at hand is provided at the beginning of each chapter which is then followed by in depth examinations of pertinent theories, experimental methods and applications in the actual world. Additionally, this book has included images, tables and examples that have been worked out throughout the whole of the book to improve comprehension and make learning easier. This textbook will prove to be an invaluable resource for you regardless of whether you are a student who is just starting in the field of pharmaceutical sciences or an experienced professional who is eager to enhance your knowledge; you will find it not only educational but also interesting and ultimately helpful to your study of physical pharmaceutics as well as your practice in the field. **ADME**

**Processes in Pharmaceutical Sciences** Alan Talevi, Pablo A. Quiroga, 2024-03-27 Absorption, Distribution, Metabolism and Excretion (ADME) processes and their relationship with the design of dosage forms and the success of pharmacotherapy form the basis of this upper level undergraduate/graduate textbook. Whereas primarily oriented to Pharmacy students and graduates, it can also be useful for scientists from different fields related to pharmaceutics and pharmacology, e.g. material scientists, material engineers, medicinal chemists, physicians who might be working in positions in pharmaceutical companies or whose work might benefit from basic training in the ADME concepts and related biological background. Pedagogical features such as objectives, keywords, discussion questions, summaries and case studies are included as teaching tools. This book will provide not only general knowledge on ADME processes but also an updated insight on some hot topics such as drug transporters, multi drug resistance related to pharmacokinetic phenomena, last generation pharmaceutical carriers, nanopharmaceuticals, in vitro and in vivo bioequivalence studies, biopharmaceuticals, pharmacogenomics, drug drug and food drug interactions, in silico and in vitro prediction of ADME properties or chronopharmacokinetic. In comparison with other similar textbooks, around half of the volume would be focused on the relationship between expanding scientific fields and ADME processes. Each of these burgeoning fields has a separate chapter in the second part of the volume and is written with experts on the correspondent topic, including industrial scientists and academics from USA and UK. Additionally, each of the initial chapters dealing with the generalities of drug absorption, distribution, metabolism and excretion would include

relevant classic examples related to each topic with appropriate illustrations ADME Processes and Pharmaceutical Sciences is written as a core textbook for courses on pharmaceutical sciences pharmacology pharmacokinetics drug delivery biopharmaceutics drug design and medicinal chemistry courses      **Introduction to General Toxicology** Everhardus Jacobus Ariëns,A.
