Technologies Ramesh K. Choudhary, Jyotsna Kumar Mandal, Dhananjay Bhattacharyya, 2017-10-24 This volume contains selected papers presented at the 10th International Conference on Advanced Computing and Communication Technologies 10th ICACCT 2016 technically sponsored by Institution of Electronics and Telecommunication Engineers India held during 18-20 November 2016 at Asia Pacific Institute of Information Technology Panipat India The volume reports latest research on a wide range of topics spanning theory system applications and case studies in the fields of computing and communication technologies Topics covered are robotics computational intelligence encompassing fuzzy logic neural networks GA and evolutionary computing applications knowledge representation data encryption distributed computing data analytics and visualization knowledge representation wireless sensor networks MEM sensor design analog circuit statistical machine translation cellular automata and antenna design The volume has 31 chapters including an invited paper on swarm robotics grouped into three parts viz Advanced Computing Communication Technologies and Micro Electronics and Antenna Design The volume is directed to researchers and practitioners aspiring to solve practical issues particularly applications of the theories of computational intelligence using recent advances in computing and communication technologies Information and Communication Technologies for Agriculture—Theme I: Sensors Dionysis D. Bochtis, Maria Lampridi, George P. Petropoulos, Yiannis Ampatzidis, Panos Pardalos, 2022-04-11 This volume is the first I of four under the main themes of Digitizing Agriculture and Information and Communication Technologies ICT The four volumes cover rapidly developing processes including Sensors I Data II Decision III and Actions IV Volumes are related to digital transformation within agricultural production and provision systems and in the context of Smart Farming Technology and Knowledge based Agriculture Content spans broadly from data mining and visualization to big data analytics and decision making alongside with the sustainability aspects stemming from the digital transformation of farming The four volumes comprise the outcome of the 12th EFITA Congress also incorporating chapters that originated from select presentations of the Congress The focus in this volume is on different aspects of sensors implementation in agricultural production e.g. types of sensors parameters monitoring network types connectivity accuracy reliability durability and needs to be covered and provides variety of information and knowledge in the subject of sensors design development and deployment for monitoring agricultural production parameters The book consists of four 4 Sections The first section presents an overview on the state of the art in sensing technologies applied in agricultural production while the rest of the sections are dedicated to remote sensing proximal sensing and wireless sensor networks applications Topics include Emerging sensing technologies Soil reflectance spectroscopy LoRa technologies applications in agriculture Wireless sensor networks deployment and applications Combined remote and proximal sensing solutions Crop phenology monitoring Sensors for geophysical properties Combined sensing technologies with geoinformation systems div **Information and Communication Technologies in Tourism 2013**

Lorenzo Cantoni,Zheng (Phil) Xiang,2013-11-18 The papers presented in this volume advance the state of the art in social media and Web 2.0 electronic tourism marketing web site and search engine optimization technology adoption and diffusion online communities tourism management and decision support eLearning mobile technologies and applications in tourism recommender systems e intermediaries and networks in tourism customer research in e tourism and user generated content The volume collects research papers of prominent scholars from around the world with a disciplinary background in the fields of social or computer sciences The book covers the most significant topics within the study field of electronic tourism and addresses both academics and practitioners interested in the latest advances in the electronic travel and tourism domain

Information Communication Technologies: Concepts, Methodologies, Tools, and Applications Van Slyke, Craig,2008-04-30 The rapid development of information communication technologies ICTs is having a profound impact across numerous aspects of social economic and cultural activity worldwide and keeping pace with the associated effects implications opportunities and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence

Proceedings of the Second International Conference on Artificial Intelligence and Communication Technologies (ICAICT 2024) Lakhmi C. Jain,Roumiana Kountcheva,Kazumi Nakamatsu,Srikanta Patnaik,2025-02-13 This book gathers selected papers presented at the International Conference on Artificial Intelligence and Communication Technologies ICAICT2024 held at Shenzhen China during June 2024 The book focuses on the newest methods and algorithms in smart wireless communications in the areas of remote sensing and machine learning intelligent image and data processing health systems and security intelligent teaching applications and many others

Broadband Terahertz Communication Technologies Jianjun Yu,2021-06-28 This book highlights the comprehensive knowledge and latest progress in broadband terahertz THz technology THz communication technology is believed to be one of the major choices that succeed the fifth generation 5G communication technology With years of efforts the author's team has created a number of world records in the generation transmission and reception of ultra wideband THz signal realizing the MIMO transmission and reception of THz communication the THz signal transmission with communication capacity of 1 Tbit/s and the optical fiber and THz integrated transmission A variety of linear and nonlinear algorithms for multi carrier and single carrier THz communication systems are developed which greatly improves the transmission performance of broadband systems The book covers in details the broadband THz signal generation long distance transmission and high sensitivity detection It is of great reference value for researchers engineers and graduate students in optical and wireless communications

Cityscape in the Era of Information and Communication Technologies Agata Bonenberg,2017-10-31 This book discusses the impact of information and communication technologies particularly social media on the structure and landscape of contemporary cities It presents a multidisciplinary range of theories and practical case studies and addresses a broad readership from graduate students to practitioners active in the fields of urbanism and the architectural design of
