Introduction To Dialectical Logic:

Introduction to Dialectical Logic Henri Wald, 1975-01-01 *Concepts* Andy Blunden, 2012-07-19 This book offers an overview of theories of the Concept drawing on the philosopher Hegel and the Soviet psychologist Lev Vygotsky Concepts are shown to be both units of the mind and units of a cultural formation *Digital Democracy and the Digital Public Sphere* Christian Fuchs, 2022-11-30 This sixth volume in Christian Fuchs Media Communication and Society series draws on radical Humanist theory to address questions around the digital public sphere and the challenges and opportunities for digital democracy today The book discusses topics such as digital democracy the digital public sphere digital alienation sustainability in digital democracy journalism and democracy public service media the public service Internet and democratic communications Fuchs argues for the creation of a public service Internet run by public service Media that consists of platforms such as a public service YouTube and Club 2 0 a renewed digital democracy and digital public sphere version of the legendary debate programme formats Club 2 and After Dark Overall the book presents foundations and analyses of digital democracy that are interesting for both students and researchers in media studies cultural studies communication studies political science sociology Internet research information science as well as related disciplines Contemporary Chinese Marxism Chengbing Wang, 2023-08-22 This book provides a comprehensive and in depth survey of the foundational research orientations of contemporary Chinese Marxism The chapters in this book not only attach importance to the exploration of classic Marxist texts but also explore the challenges posed on classic Marxist texts by modernity and in doing so highlight the relationship between Marxism and the traditional Chinese culture As a school of thought Marxism has exerted tremendous influence on fields of humanities and social sciences over the course of its introduction dissemination and development Through this volume well established Chinese scholars from Mainland China also discuss contemporary Chinese Marxism in an interdisciplinary context Further this volume facilitates dialogues exchanges and collisions of ideas between researchers of contemporary Chinese Marxism on one side and the researchers of Western Marxism on the other This book will be a great resource for academics researchers and advanced students of Marxism philosophy and sociology The chapters in this book were originally published in the journal Educational Philosophy and Theory *Dialectics* Nicholas Rescher, 1977-01-01 This book explores a disputational approach to inquiry Such a focus on disputation is useful because it exhibits epistemological process at work in a setting of socially conditioned interactions This socially oriented perspective reflects the anti Cartesian animus of the dialectical approach to epistemology It strives to avert the baneful influence of the egocentric orientation of recent approaches in the theory of knowledge The traditional and orthodox emphasis on the epistemological questions How can I convince myself and How can I be certain invites us to forget the fundamentally social nature of the ground rules of probative reasoning their rooting in the issue of how we can go about convincing one another The dialectic of disputation and controversy provides a useful antidote to such cognitive egocentrism by affording a point of departure in

epistemology which blocks any temptation to forget the crucial fact that the buildup of knowledge is a communal enterprise subject to communal standards Mexican Studies in the History and Philosophy of Science S. Ramirez, Robert S.

Cohen, 2012-12-06 For a North American seeking to know the Mexican mind and especially the sciences today and in their recent development a great light of genius is to be found in Mexico City in the late 17th century The genius is that of one who surely may be counted as the first Mexican philosopher of nature a nun of the Order of Saint Jerome Sor Juana Ines de la Cruz Sor Juana must speak for herself from her penetrating exercise of an independent mind within a political and religious formation which denigrated women and circumscribed reason itself To understand this world of ours to join in an enlightenment which would be both natural and inspired Sor Juana clearly understood the requirements of learning observing logic and reasoning In darkness foundering Words fail the troubled mind For who I ask can light me When Reason is blind Even now after the great steps toward liberation of women and the substantial scientific contributions toward sheer empirical awareness of both the multiple orders of Nature and the subtle aesthetics of individual art and social harmony we too in the earthly world of the 20th century must affirm what she affirmed **Dialectical Materialism, an Introduction**

The Psychological and Cultural Foundations of East Asian Cognition Julie Spencer-Rodgers, Kaiping Peng, 2017-12-07 The unprecedented economic growth in many East Asian societies in the few past decades have placed the region center stage and increasing globalization has made East West cultural understanding of even greater importance today The Psychological and Cultural Foundations of East Asian Cognition is one of the most comprehensive volumes on East Asian cognition and thinking styles to date and is one of the first to bring together a large body of empirical research on naive dialecticism and analytic holistic thinking theories stemming from Richard Nisbett's highly influential *The Geography of Thought* Edited by Julie Spencer Rodgers and Kaiping Peng The Psychological and Cultural Foundations of East Asian Cognition expertly examines the psychological philosophical and cultural underpinnings and consequences of these thinking theories for human thought emotion and behavior In the past couple of decades research on this topic has flourished and East West cultural differences have been documented in almost all aspects of the human condition from the manner in which people reason and make decisions conceptualize themselves and those around them to how they cope with stress and mental illness and interact with others including romantic partners and social groups Contributions to this volume cover such fascinating and diverse topics as cultural neuroscience and the brain lifespan development attitudes and group perception romantic relationships the adoption of foreign mindsets and perspectives creativity emotion the self concept racial and ethnic identity psychopathology and coping processes and wellbeing Further the research featured within this volume has practical implications for business and organizational management international relations and politics education and clinical and counseling psychology and may be of particular interest to business

professionals managers in government and non profit sectors as well as educators and clinicians working with East Asians and Americans of East Asian descent *Architecture and Space Re-imagined* Richard Bower,2016-06-10 As with so many facets of contemporary western life architecture and space are often experienced and understood as a commodity or product The premise of this book is to offer alternatives to the practices and values of such westernised space and Architecture with a capital A by exploring the participatory and grass roots practices used in alternative development models in the Global South This process re contextualises the spaces values and relationships produced by such alternative methods of development and social agency It asks whether such spatial practices provide concrete realisations of some key concepts of Western spatial theory questioning whether we might challenge the space and architectures of capitalist development by learning from the places and practices of others Exploring these themes offers a critical examination of alternative development practices methods in the Global South re contextualising them as architectural engagements with socio political space The comparison of such interdisciplinary contexts and discourses reveals the political social and economic resonances inherent between these previously unconnected spatial protagonists The interdependence of spatial issues of choice value and identity are revealed through a comparative study of the discourses of Henri Lefebvre John Turner Doreen Massey and Nabeel Hamdi These key protagonists offer a critical framework of discourses from which further connections to socio spatial discourses and concepts are made including post marxist theory orientalism post structural pluralism development anthropology post colonial theory hybridity difference and subalterneity By looking to the spaces and practices of alternative development in the Global South this book offers a critical reflection upon the working practices of Westernised architecture and other spatial and political practices In exploring the methodologies implications and values of such participatory development practices this book ultimately seeks to articulate the positive potential and political of learning from the difference multiplicity and otherness of development practice in order to re imagine architecture and space **Hegel's Philosophy of Right, with Marx's**

Commentary H.P. Kainz,2012-12-06 GEORG WILHELM FRIEDRICH HEGEL 1770 1831 THE PLACE OF HEGEL IN THE HISTORY OF PHILOSOPHY In order to gain a proper perspective of Hegel s place in the history of philosophy it might be useful to focus on one key concept which has evolved significantly in meaning from the time of Aristotle to Hegel I am speaking of the philosophical concept of the category In Aristotle s system there were ten categories or predicaments of reality or being These included substantiality time place quantity quality and other aspects of knowable beings The most notable thing about these categories is that they all have to do with what we would call objective realities That is none of them purport to describe subjective or mental states or conditions In modern philosophy i e philosophy since the time of Descartes there was a swing of the pendulum in the opposite direction from objectivity to subjectivity culminating in the twelve new categories of Kant All of Kant s categories were subjective ways of looking at reality We can organize objective phenomena into universal unities therefore the first Kantian category is unity We can separate objective phenomena into particular divisions therefore

the second category is plurality And so forth With Hegel the modern trend to subjectivism is arrested and we have not surprisingly a new type of category the category of the unity of thought and being of self and other of subject and object

Dialectical Logic; Essays on its History and Theory Evald Vasilyevich Ilyenkov,2008 This book traces the development of Dialectical Logic within the history of modern western philosophy culminating in Marx s materialist dialectics It brings out the essential contours of Logic through a detailed exposition of the ontological and epistem *Paradox, Dialectic, and System* Howard P. Kainz,2010-11 This book undertakes a critical analysis of some central problems in Hegel scholarship It is concerned with clarifying the theoretical underpinnings of paradox the possible relationship of paradox to a dialectic logic and the possibilities of systematization of dialectic and or paradox The author begins with a discussion of current attitudes toward paradox in mathematics science and logic and then moves gradually toward a differentiation of philosophical paradox in the strict sense from literary religious and logic paradox The relationship of dialect to paradox is elucidated by means of a phenomenological analysis of self consciousness Finally possible approaches to the systematization of dialectic are considered Analyzing and evaluating Hegel s dialectical paradoxical system in particular Dr Kainz also addresses the question of viable alternatives to Hegel s approach While paradox is generally considered by philosophers and logicians as something to be avoided Kainz s study investigates the possibility that it is an important and even indispensable element of constructive thinking in philosophy as well as other disciplines *Paradox Dialect and System* is this a contribution not only to Hegel scholarship but to philosophy itself It will be of particular interest to this concerned with the differentiation of dialectical and nondialectical philosophical systems and with the prevalence of paradox in literature religion and contemporary physics The Formalization of Dialectics Elena Ficara,Graham Priest,2023-12-01 This book explores the relationship between Hegel s dialectics and formal logic It examines the concept of dialectics its meaning and its use in contemporary thought The volume opens the old debate about the formalization of Hegel s dialectics and is motivated by the idea that asking about the connection between Hegel s dialectics and formal logic is still relevant for various reasons Firstly a new Hegel is circulating nowadays in the philosophical literature with specific reference to Hegel s dialectical logic and its relation to the history and philosophy of logic Secondly new research about the connection between contradictory logical systems and Hegel s dialectics is also being developed Finally there have been recent confirmations that the concept of dialectics is of general interest and that the usual perplexities about the Hegelian triadic and fairly mechanic device of yes

not and not not are in remission The chapters feature philosophically and historically motivated presentations of formal features of Hegel s dialectics critical considerations about the very idea of formalizing dialectics and presentations of past attempts to formalize Hegel s dialectics The Formalization of Dialectics will be a key resource for scholars and researchers of the history and philosophy of logic and Hegel s dialectics It will also be of interest to anyone who wants to know more about the concept of dialectics its meaning and its use in contemporary thought This book was originally published as a special issue of History and Philosophy of Logic

Rhetoric & Dialectic in the Time of Galileo Jean Dietz Moss,William A. Wallace,2003 Examines the teaching and practice of the twin arts of argumentation rhetoric and dialectic in the time of Galileo Galileo was an ardent controversialist on behalf of his astronomical theories yet many today are unacquainted with the kinds of argument that became a focal point in his famous trial The authors combine their vast knowledge of rhetoric history and philosophy to explain the background of the dispute between science and religion They present an engaging discussion of the prevailing modes of rhetorical and scientific arguments in Northern Italy during the Renaissance They display primary texts on the arts of rhetoric and dialectic by authors whose thought was known to Galileo

An Introduction to the Logic of Marxism George Edward Novack,1969 *Marx's Capital, Method and Revolutionary Subjectivity* Guido Starosta,2015-11-24 In Marx s Capital Method and Revolutionary Subjectivity Guido Starosta develops a materialist inquiry into the social and historical determinations of revolutionary subjectivity Through a methodologically minded critical reconstruction of the Marxian critique of political economy from the early writings up to the Grundrisse and Capital this study shows that the outcome of the historical movement of the objectified form of social mediation which has turned into the very alienated subject of social life i e capital is to develop as its own immanent determination the constitution of the self abolishing working class as a revolutionary subject A crucial element in this intellectual endeavour is the focus on the intrinsic connection between the specifically dialectical form of social science and its radical transformative content

Capitalism and the Dialectic John R. Bell,2009-09-07 From the 1960s to the

1990s the ground breaking Japanese economists Kozo Uno and Thomas Sekine developed a masterful reconfiguration of Marxist economics The most well known aspect of which is the levels of analysis approach to the study of capitalism Written in Japanese the Uno Sekine approach to Marx s work is little understood in West John Bell seeks to correct this explaining how problematic elements of Marxian Political Economy such as the law of value and the law of relative surplus population can be solved by using a more rigorous dialectical analysis Bell s clear and accessible synthesis provides economists with the tools to interrogate capitalism in a more powerful way than ever before
