**Changing Values in Medical and Healthcare Decision-Making** Uffe Juul Jensen, Gavin Mooney, 1991-01-08 This work charts the progress of changing values in medical and healthcare decision making particularly as a result of economic pressures and the role of clinical ethics in determining what courses of action and treatment medical and healthcare professionals should pursue It evaluates the concepts involved in ethical decision

making such as risk and need and whose values are relevant to which decisions and looks at the changing emphasis of medicine and the relevance of value judgments in clinical decisions This stimulating work incorporates a number of different perspectives disciplines cultures and nationalities to provide a multi disciplinary international approach In addition to medical and economic issues the book also discusses philosophical and legal aspects *Health planning reports subject index* United States. Health Resources Administration,1979 **Handbook of Health Administration and Policy** Anne Kilpatrick,1998-11-23 This comprehensive text offers a broad view of health care policy health services delivery and organization and health care management Drawing on the insights of over 100 scholars and leading practitioners it highlights organizational changes reflected in health care mergers networks and affiliations and describes the role of funding agencies in the direct provision of services Providing over 2350 references tables and drawings the book charts the influences of managed care on provisions funding and the configuration of providers and services and portrays the increasingly influential and challenging role of health administrators NHSQIC Annual Bibliography National Health Standards and Quality Information Clearinghouse (U.S.),1979 **Health Care Financing Review** ,1987 *Health Care Policy In East Asia: A World Scientific Reference (In 4 Volumes)* ,2019-11-25 During the past three decades health care systems in the East Asian regions of China Japan South Korea and Taiwan have undergone major changes Each system has its unique achievements and challenges Global health care policymakers are increasingly interested in understanding the changes that have taken place in these four systems This four volume reference set is designed to help health care professionals academics policymakers and general readers gain a good grasp of the background and latest developments in the health care systems of China Japan South Korea and Taiwan This reference set provides an in depth comparative health policy analysis and discussion of health care reform strategies in each of these systems One unique feature of this set is that each volume has been edited by a leading scholar who has been deeply involved in the development of the health care system in that particular region Each of these editors also has invited both scholars and practitioners to provide a first hand description and analysis of key health care reform issues in that system The many examples provided in each volume demonstrate how findings of evidence based policy research can be implemented into policy practice Volume 1 describes and discusses China s ambitious and complex journey of health care reform since 2009 The Chinese government has achieved universal health insurance coverage and has embarked on reforms of the service delivery system and provider payment methods that are aimed at controlling health expenditure growth and improving efficiency This volume includes pilot and social experiments initiated by the government and researchers and their evaluations that have guided the formulation of health reform policies It provides information on how to make reforms work at the local and provincial levels The findings detailed in this volume will contribute to a global knowledge base in health care reforms Volume 2 provides a comprehensive review and evaluation of the Japanese health care system Japan has a long history of health care system development and

provision of universal health coverage with a mature and well developed health care system among East Asian countries. However, due to increases in health care costs, economic stagnation, and the country's rapidly aging population, Japan has undergone significant health care reform during the last two decades, both in the delivery as well as financing of health services in its hospital sector, medical technology sector, and long term care insurance. Despite these challenges and reforms, health outcomes among the Japanese population have been progressively among the best in the world. This volume shows how policy research can lead to policy analysis, implementation, and assessment. It also provides valuable lessons learnt for mutual learning among other health care systems. Volume 3 offers a comprehensive review of the developments in South Korea's national health insurance system since 1989 in terms of financing, delivery systems, and outcomes. The volume analyzes the efficiency of cost and service delivery by public sectors versus private sectors. It points out areas of challenge to future Korean health care reform. Chapter authors in this volume are leading experts involved in Korean health care policy implementation. Volume 4 reviews the development and achievements of Taiwan Health Insurance since 1995. Because of its continuous reform in payment, services, delivery, and pharmaceutical technology, Taiwan has been considered a model example of universal health insurance among global health systems. This volume shows the processes used to translate policy research findings into policy changes. While the health care reform in Taiwan is ongoing, the Taiwan example provides a real world and practical understanding of health care system changes. In summary, this four volume set makes an outstanding contribution to health care system reform and policy research based on solid scholarly work. It also introduces policy researchers and academic communities to current debates about health systems, health financing, and universal health coverage. This reference volume is a must for anyone keen on East Asia's health care system reform dynamics and changing scene.

**Health Care Service Management** Marie Eloïse Muller, Marie Muller, Marthie Bezuidenhout, Karien Jooste, 2006. This comprehensive management manual brings together a holistic philosophy of health care, an overview of good business practices, and guidelines for compliance to national and international hospital accreditation standards. Chapters cover conceptual frameworks for health service delivery, strategic planning, good governance, financial management, human resource management, and continuous quality improvement. The philosophy of Ubuntu, the African notion that everyone in a community is responsible for the welfare of its members, is also discussed as a necessary consideration in all health care decisions. *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1974. **Epidemiology and the Delivery of Health Care Services** Denise M. Oleske, 2007-05-08 In the previous edition of this book the predominant theme was applying epidemiology to assist managers in dealing with an environment in which the structure of health care financing was rapidly changing to managed care and in which there was increasing competition among health care providers While these phenomena continue to exist new challenges have emerged and in particular the explosion of information technology has given way to a global society and decision making that is increasingly shared with consumers because of their access to the same sets of data Thus the questions with which health care managers are confronted on a daily basis are now exceedingly more complex

- 1 How can a population be defined considering that both exposures and diseases originating in one corner of the globe can rapidly become a threat to any nation s security
- 2 Where do influences on a population begin and end
- 3 How can we protect and promote health in that population or any population if privacy is preeminent

This edition brings in this editor s view of the increasing need for health care managers be they in private or public settings to use epidemiological concepts and methods The challenges posed by health care delivery in the 21st century are immense ranging from redefining life and health given the advances in genetic technology global environmental changes and multinational simultaneous increases in poverty and longevity to economic decisions regarding technology and service levels that fewer and fewer can afford
