*Intersections of Contemporary Art, Anthropology and Art History in South Asia* Sasanka Perera, Dev Nath Pathak, 2019-02-23 Taking South Asia as its focus, this wide-ranging collection probes the general reluctance of the cultural anthropology to engage with contemporary visual art and artists including painting, sculpture, performance art and installation. Through case studies engaged equally in anthropology and visual studies, contributors examine art and artistic production in India, Sri Lanka, Pakistan, Bangladesh and Nepal to bring the social and political complexities of artistic practice to the fore. Demonstrating the potential of the visual as a means to understand a society, its values and its politics, this volume ranges across discourses of anthropology, sociology, biography, memory, art history and contemporary practices of visual art. Ultimately, *Intersections of Contemporary Art, Anthropology and Art History in South Asia* simultaneously expands and challenges the disciplinary foci of two fields: it demonstrates to art criticism and art history the necessity of anthropological and sociological methodologies and theories while at the same time challenging the iconophobia of social sciences.

**An Environmental History of Australian**

**Rainforests until 1939** Warwick Frost, 2020-06-10 This book provides a comprehensive environmental history of how Australia's rainforests developed the influence of Aborigines and pioneers farmers and loggers and of efforts to protect rainforests to help us better understand current issues and debates surrounding their conservation and use While interest in rainforests and the movement for their conservation are often mistakenly portrayed as features of the last few decades the debate over human usage of rainforests stretches well back into the nineteenth century In the modern world rainforests are generally considered the most attractive of the ecosystems being seen as lush vibrant immense mysterious spiritual and romantic Rainforests hold a special place both providing a direct link to Gondwanaland and the dinosaurs and today being the home of endangered species and highly rich in biodiversity They are also a critical part of Australia's heritage Indeed large areas of Australian rainforests are now covered by World Heritage Listing However they also represent a dissonant heritage What exactly constitutes rainforest how it should be managed and used and how much should be protected are all

issues which remain hotly contested Debates around rainforests are particularly dominated by the contradiction of competing views and uses seeing rainforests either as untapped resources for agriculture and forestry versus valuing and preserving them as attractive and sublime natural wonders Australia fits into this global story as a prime example but is also of interest for its aspects that are exceptional including the intensity of clearing at certain periods and for its place in the early development of national parks This book will be of great interest to students and scholars of Environmental History Australian History and Comparative History
