W. Moore,2019-06-28 These essays by A W Moore are all concerned with the business of representing how things are its nature its scope and its limits The essays in Part One deal with linguistic representation and discuss topics such as rules of representation and their nature the sorites paradox and the very distinction between sense and nonsense Wittgenstein s work both early and late figures prominently One thesis that surfaces at various points is that some things are beyond representation The essays in Part Two deal with representation more generally and with the character of what is represented and owe much to Bernard Williams s argument for the possibility of representation from no point of view They touch more or

less directly on the distinction between representation from a point of view and representation from no point of view in some cases by exploring various consequences of Kant's belief that representation of how things are physically is always eo ipso representation from a point of view. One thesis that surfaces at various points is that nothing is beyond representation. Each of the essays in Part Three which draw inspiration from the early work of Wittgenstein indicate how the resulting tension between Parts One and Two is to be resolved namely by construing the first part as a thesis about states of knowledge or understanding and the second part as a thesis about facts or truths.

**Commemoration** Titus Ensink, Christoph Sauer, 2003-11-27 The Art of Commemoration focuses on a particular historical event that illustrates how nations define their own identities and establish mutual relations in their discourse the Warsaw Uprising of August 1944 and its Commemoration in 1994 This Commemoration was an innovative and unique form of transnational communication because it brought together representative speakers from all parties involved They considered the commemorated event from different perspectives the victim Poland the former enemy Germany and the former allies England USA France and other countries as well as Russia which liberated Poland but had not supported the Uprising A letter from the Pope added a Catholic perspective The art of commemoration consists in invoking the past events from one s own perspective while simultaneously considering the other perspectives as well as in making sense of the past and present at the same time This volume analyses the artful way in which the speakers coped with these complexities in a full discourse analytic reconstruction of each address *Academic Freedom and the Transnational Production of Knowledge* Dina Kiwan, 2024-01-25 Public debates on academic freedom have become increasingly contentious and understandings of what it is and its purposes are contested within the academy policymakers and the general public Drawing on rich empirical interview data this book critically examines the understudied relationship between academic freedom and its role in knowledge production across four country contexts Lebanon the UAE the UK and the US through the lived experiences of academics conducting controversial research It provides an empirically informed transnational theory of academic freedom contesting the predominantly national constructions of academic freedom and knowledge production and the methodological nationalism of the field It is essential reading for academics and students of the sociology of education as well as anyone interested in this topic of global public concern This title is part of the Flip it Open Programme and may also be available Open Access Check our website Cambridge Core for details *Equity in STEM Education Research* Alberto J.

promising STEM research with a focus on equity diversity and social justice that are funded with limited or no public funding It also presents anecdotes from authors in relation to their struggles in either securing funding for their reported study or seeking to publish its findings This provides more context to the challenges of conducting non mainstream research in science STEM education Most of the contributors are scholars of color and or women conducting research with traditionally marginalized populations in science STEM Thus this book offers an additional venue to share the voices of marginalized scholars and allies seeking to broaden our understanding of the challenges and successes of promoting equity diversity and social justice in various educational contexts
