**Improving Education Through Research, Development, Demonstration, Dissemination, Training** United States. Office of Education. Bureau of Research, 1967      **Improving Education in a World of Politics** M. Scott Norton, 2018-10-05 This book centers on the fact that public education is involved in the politics of the world just as other systems and organizations are involved in competing for the values and resources of the many communities Keeping education out of politics or politics out of education is fallacious As long as public education is financed by taxes local state or national it must compete with other agencies and programs for the available tax dollars These realities make it necessary for school leaders to be knowledgeable of how the values and resources of the school community are distributed This need calls for an understanding of how important decisions are made or not made that affect the outcomes of public education If public schools are to remain relevant and in the main stream of public issues and related decisional outcomes they must become more knowledgeable of the political world of education and how important decisions are determined regarding educational support      *Improving Education Through: Research, Development, Demonstration, Dissemination, Training, Fiscal Year 1967, Annual Report, Bureau Research* United States.
