Emerging Science and Technology for Human Well-Being Syafiqah Saidin,Mohd Shahrizal Sunar,Yuan Wen Hau,Eileen Su Lee Ming,Siti Aisyah Mualif,Farah Hanis Juhari,Fatimah Ibrahim,2025-08-05 This book covers advances in science and technologies promoting human health and or enhancing everyday life It discusses new methods to improve monitoring therapy or rehabilitation advances in telemedicine machine learning applications in image processing advanced materials for drug delivery and a wide range of issues related to human computer interaction AI applications sport technologies and technology safety Based on the International Human Centered Conference 2024 iHumEnTech 2024 held on November 28 29 2024 in Senai Johor Malaysia this book offers a timely reference for both academics and professionals in the broad field of biomedical engineering health technology and human technology interaction Skills for the 21st Century in Latin America and the Caribbean Cristian Aedo,Ian Walker,2012-02-07 This report contributes to the debate about the quality of education and returns to education investment in Latin America and the Caribbean LCR It aims to improve our understanding of the links from investment in education and training to labor market outcomes and to provide a basis for

policy choices that will strengthen future outcomes The report is organized in four main chapters Chapter 2 documents the recent downturn in education earnings premia using standard mincerian regressions based on household survey data Chapter 3 explores the underlying supply side and demand side drivers of the trends in premia It documents the recent expansion of education coverage in LCR benchmarks it against other regions and presents an in depth analysis of the relative importance of shifts in the supply and demand for skills in generating declining earnings premia Using a methodological approach first developed by Katz and Murphy it concludes that demand side changes appear to be the critical factor It also analyzes the role of institutional factors finding that minimum wages also have likely played an important role in the compression of labor earnings Chapter 4 focuses on trends in student achievement and the cost effectiveness of secondary education It analyzes trends data from the OECDs PISA survey of 15 year old children in secondary education which covered nine LCR countries in 2009 It shows that achievement is improving slowly but remains well behind the OECD It presents benchmarking evidence suggesting that LCR may be both under resourcing secondary education and also getting poor returns per dollar invested a classic low quality equilibrium Chapter 5 presents evidence on the fit between the skill set of LCR workers and the needs of the economy applying an approach first developed by Levy and Murnane in the U S A Analysis of the industrial composition of employment in four countries suggests that LCR is lagging in those industries that require relatively sophisticated new economy skills in the U S A Further evidence that cutting edge firms in LCR might be facing skill constraints comes from the hiring lags registered in enterprise surveys
