Leopard Diaries Sanjay Gubbi, 2022-10-10 Evolution is an exquisite artist even if an unconscious one Eric Dinerstein The leopard is perhaps one of the world's most beautiful creatures The spots on its body are even romantically called rosettes It is social but solitary inconspicuous but significant in numbers large but elusive and does not fit any of the pigeonholes of large cat conservation In India the leopard is a poster boy of the fight to preserve wildlife but in many countries it faces either ecological or local extinction A worrying phenomenon given that these cats carry out important ecosystem services that have not been fully understood yet In *Leopard Diaries* The Rosette in India Sanjay Gubbi who has studied and documented the leopard for nearly a decade gives us a close look at this fascinating creature From detailing its food habits to throwing new light on how the young are reared from offering suggestions on tackling leopard human conflict to imagining the future of this arresting animal this book is a 360 degree view of the leopard its ecological context its fraught relationship with the human world and how wildlife and human beings can find a way to co exist *Leopard Radio* Jacqueline Disler, 1989

to destroy the elaborate floral display She taste tests rat bait learns how to install a vulture effigy and gets mugged by a macaque Combining little known forensic science and conservation genetics with a motley cast of laser scarecrows langur impersonators and trespassing squirrels Roach reveals as much about humanity as about nature s lawbreakers When it comes to problem wildlife she finds humans are more often the problem and the solution Fascinating witty and humane Fuzz offers hope for compassionate coexistence in our ever expanding human habitat **The Snow Leopard and the Goat**

Shafqat Hussain,2020-01-10 Who should bear the cost of protecting charismatic wildlife Following the downgrading of the snow leopard s status from endangered to vulnerable by the International Union for Conservation of Nature in 2017 debate has renewed about the actual number of snow leopards in the wild and the most effective strategies for coexisting with these enigmatic animals Evidence from Pakistan and other countries in the snow leopard s home range shows that they rely heavily on human society domestic livestock accounts for as much as 70 percent of their diet Maintaining that the snow leopard is a wild animal conservation NGOs and state agencies have enacted laws that punish farmers for attacking these predators while avoiding engaging with efforts to mitigate the harms suffered by farmers whose herds are reduced by snow leopards This ethnography examines the uneven distribution of costs and benefits involved in snow leopard conservation and shows that for the conservation of nature to be successful the vision interests and priorities of those most affected by conservation policies in this case local farmers must be addressed A case history of Project Snow Leopard in the mountains of northern Pakistan which inspired similar programs in India Bhutan Nepal Mongolia Afghanistan and Tajikistan describes how the animal s food habits are studied how elusive individuals are counted and how a novel kind of snow leopard insurance has protected the species by compensating farmers for livestock losses The Snow Leopard and the Goat demonstrates that characterizing this conflict as one between humans farmers and wildlife snow leopards is misleading as the real conflict is between two human groups farmers and conservationists who see the snow leopard differently *Tiger Moon* Fiona Sunquist,Mel

questions long accepted rules of primate socioecology and redefines the field from the ground up In *Primate Socioecology* renowned researcher Lynne A Isbell offers a fresh perspective on primate social organizations that redefines the field from the ground up Through her innovative Variable Home Range Sharing model Isbell unravels the mystery of why some primates live alone while others live in pairs or groups a question that has perplexed scientists for decades This new approach diverges from the traditional focus on predation pressure as the main determinant of primate social organization to reveal deeper ecological causes of primate behavior The implications of this shift are profound underscoring the critical importance of a behavioral ecological mechanism in which varying movement strategies affect which females share their home ranges and ultimately pointing to a new functional classification system for primate social organizations Isbell also discusses a supportive test of predicted movement strategies using activity budgets why thermal constraints explain the dichotomy between small nocturnal primates and large diurnal primates the role of sensory differences in nocturnal solitary foragers versus diurnal group living primates Useful as both an introduction to primate socioecology and for those seeking a robust examination of the topic *Primate Socioecology* addresses scientific debates about primate social organizations and invites researchers to question long held assumptions
