International Yearbook of Nephrology 1991 V.E. Andreucci, Leon G. Fine, 2012-12-06 The 1991 International Yearbook of Nephrology is the third in a successful series which has as its principal aim the presentation of a comprehensive list of topics of the greatest current relevance to clinical nephrologists We believe that by following the subjects covered by the Yearbook in the broad field of nephrology the practicing nephrologist and nephrologist in training can stay abreast of a number of rapidly advancing fields To improve the quality of the Yearbook we have appointed an Editorial Board to provide suggestions for topics and authors Thus we have invited 58 outstanding nephrologists from around the world the list of them is included in this issue of the Yearbook to identify annually potential topics for the Yearbook The reply was excellent and the contribution quite outstanding Thus for the 1992 Yearbook we received more than 150 suggestions A number of them will be included in the next issue if they continue to be viewed as current and important We also invite readers to suggest topics for upcoming issues of the Yearbook The present issue the 1991 Yearbook represents an improvement over previous volumes We expect this trend to be maintained in future years As in previous issues all chapters provide a complete accurate and up to date list of important references We are grateful to all the authors for their excellent contributions and for having fulfilled the deadline in forwarding their manuscript Our special thanks to Kluwer Academic Publishers for the timely publication of this volume

Anesthesia for Renal Transplantation Gwendolyn B. Graybar, Lois L. Bready, 2012-12-06 This treatise commemorates the 32nd anniversary of the first successful allogeneic kidney transplant in a human being and the beginning of a continuing challenge for well over a generation of anesthesiologists If comparisons can be permitted this epoch making event can be ranked with the first pulmonary lobectomy and subsequently the initial ligation of a patent ductus arteriosus in the late 1930s when thoracic and cardiac surgery began Was it merely a coincidence that brought these events to the fore so close upon one another after many years of ideation and frustration Not so according to Lewis Thomas for this was the time

of medicine's second revolution its transformation from an empirical art into a powerfully effective science The remote Galenic conception of disease with its emphasis on disturbed body humors was about to be supplanted by effective therapeutics as signified by the introduction of the sulfonamides and antibiotics for the specific treatment of infection Anesthesiology had been dormant up to that era still relying upon a few agents more or less utilized from the beginning and purveyed by a handful of specialists who had not yet begun to ask the scientific questions necessary for their maturation into a bona fide discipline However anesthesiology was inevitably caught in the ferment for as Peter Caws observed It serves to remind us that the development of science is a step wise process nobody starts from scratch and nobody gets very far ahead of the rest
