Ethics and Justice. Éthique et justice Peter Kemp, Noriko Hashimoto, 2017 The main theme of volume 6 of *Eco ethica* is Ethics and Justice which focuses on the idea of justice in a metaphysical social and personal sense Justice is considered as a balance between opposite ambitions in interdependent persons and as equity in legislation but not as blind justice Today it is valuable not only on the national but also on the cosmopolitan level Before it became personal justice the idea of justice was considered metaphysical and social both in European and Chinese culture However in modern times it is often reduced to a moral duty without meta ethical responsibility The last section considers the importance of the philosophy of Paul Ricoeur 1913 2005 for clarifying the idea of justice Series *Eco Ethica* Vol 6 Subject Philosophy Ethics

Commentary and Tradition Pierluigi Donini, 2010-12-23 The volume collects the most important papers Pierluigi Donini wrote in the last three decades with the aim of promoting a better assessment of post hellenistic philosophy The philosophical relevance of post hellenistic philosophy is now widely though not yet universally recognized Yet much remains to be done The common practice of focusing each single school in itself detracts from a balanced assessment of the strategies exploited by many philosophers of the period On the assumption that debates among schools play a major role in the philosophy of the commentators Donini concentrates on the interaction between leading Aristotelians and Platonists and demonstrates that the developments of both systems of thought were heavily influenced by a continuous confrontation between the two schools And whereas in cases such as Alcinous and Aspasius this is basically uncontroversial for other authors such as Alexander Antiochus and Plutarch the pioneering work of Donini paves the way for a better understanding of their doctrines and definitely confirms the intellectual importance of the first imperial age when the foundations were laid of versions of both Aristotelianism and Platonism which were bound to influence the whole history of European thought from Late Antiquity onwards

Law, Public Policies and Complex Systems: Networks in Action Romain Boulet, Claire Lajaunie, Pierre Mazzega, 2019-05-07 This book investigates how various scientific communities e.g. legal scientists political scientists sociologists mathematicians and computer scientists study law and public policies which are portrayed here as complex systems Today research on law and public policies is rapidly developing at the international level relying heavily on modeling that employs innovative methods for concrete implementation Among the subject matter discussed law as a network of evolving and interactive norms is now a prominent sphere of study Similarly public policies are now a topic in their own right as policy can no longer be examined as a linear process rather its study should reflect the complexity of the networks of actors norms and resources involved as well as the uncertainty or weak predictability of their direct or indirect impacts The book is divided into three main parts complexity faced by jurists complexity in action and public policies and complexity and networks The main themes examined concern codification governance climate change normative networks health water management use related conflicts legal regime conflicts and the use of indicators

Reviving

Indigenous Water Management Practices in Morocco Sandrine Simon, 2021-03-15 This book demonstrates how Morocco and other semi arid countries can find solutions to water scarcity by rediscovering traditional methods of water resource management The book begins by examining indigenous water heritage considering the contribution of Islam and the mixed influences of Greek and Roman Middle Eastern Andalusian and Berber cultures It then provides a thorough examination of resource management practices in Morocco throughout history tracing the changing patterns from the instillation of agrarian capitalism in the 19th century through the Protectorate years 1912 1956 to the 21st century The book explains how reviving and modernizing traditional methods of water management could provide simple accessible and successful methods for addressing 21st century challenges such as water scarcity and climate change The work concludes by highlighting how these indigenous practices might be used to provide real world practical solutions for improving water governance and therefore developing sustainable water management practices Reviving Indigenous Water Management Practices in Morocco will be of great interest to students and scholars interested in water resource management indigenous peoples traditional knowledge and sustainable development

Ethics and Politics Peter Kemp, Noriko Hashimoto, 2015 The main theme of volume 4 of *Eco ethica* is Ethics and Politics In the first and second part the authors examine the sometimes conflictual relationship between ethics and politics from an eco ethical perspective They investigate how our conceptions of both ethics and politics have been shaped historically as well as by today's technological conjuncture The third part continues the discussion of French philosopher Paul Ricoeur 1913 2005 begun in volume 3 The essays here focus on how his conception of the connections and differences between ethics and politics led him to embrace certain paradoxes in politics and forced him to become suspicious of apolitical thinking

Developmental State of Africa in Practice Steve Kayizzi-Mugerwa, Charles Leyeka Lufumpa, 2020-12-03 This book is the product of research undertaken at the African Development Bank AfDB on the lessons that the continent of Africa can draw from the role of the state in Asia's rapid economic development in the last 50 years The book applies a cross national

comparative framework to analyse Africa's performance drawing broadly on the developmental states of Asia i.e. Japan, China, India, Vietnam etc with focus on South Korea. The book argues that for Africa to replicate Asia's developmental success it may require more than just tweaking the public sector machinery. Dedicated institutions and a citizenry capable of demanding accountability from governments must become key ingredients of the development strategy. The book also provides insight into the learning experiences of Asia in addressing key national policy challenges i.e. land reform and quality of public administration at the federal and local levels, enhancing technical skills, boosting capabilities for sciences, engineering and mathematics and industrialization.
