Corwin,William S. Basic chemistry Seese,Guido H. Daub,1981      **Laboratory Experiments in General Chemistry** Herman Schlundt,2015-06-25 Excerpt from Laboratory Experiments in General Chemistry The experiments outlined in this manual are designed primarily for college students who have not had a course in chemistry in a preparatory school The exercises represent the laboratory work of a comparatively brief introductory course in General Chemistry The experiments are to be conducted under the guidance of an instructor and are to be supplemented by class room demonstrations in connection with recitations from a text book in General Chemistry for college students or by illustrated lectures and text book assignments Frequently the experiments do not furnish sufficient information to enable the student to answer some of the questions and make the explanations that are to appear in his notebook The necessary information can generally be obtained from the text book and it is my plan to have the student use the text book and laboratory outline as companion volumes in the laboratory To facilitate the students progress in this connection page references to two widely used texts have been inserted My experience goes to show that the student will thus make very efficient use of his time that he will give care and thought to his work and that the laboratory work can be successfully made the central feature of instruction in the course In preparing the experiments the substances chosen for study have purposely been limited to avoid scattering the students efforts Intensive rather than extensive study has been the underlying idea in selecting the exercises Extended experiments on the metallic elements have not been included as I feel that this work should be undertaken in Analytical Chemistry and be allotted some of the time so largely used for laboratory practice in following a scheme of separations I fully realize the value of practice in the identification of unknown substances and this feature of laboratory work has been duly emphasized and it is hoped in a manner which preserves its educational value Emphasis has also been placed upon the general reactions of acids bases and salts the processes of oxidation and reduction and chemical changes prominent in everyday life About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **Laboratory Experiments in General Chemistry** Herman Schlundt,2007-10 PREFACE THE Author of this very practical treatise on Scotch Loch

Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing
