LABORATORY SAFETY

- Check location of emergency equipment and learn to operate it correctly (eye washes, fire blankets, showers, fire extinguishers, fire escapes, telephones)
- Be prepared for emergency situations
- Have a thorough knowledge of the basic characteristics and potential dangers of all the chemicals you work with
- Read Material Safety Data Sheets (MSDS)
- Consult Merck Index (popular chemical encyclopedia) for info
- Wear eye protection at all times
- Do not wear contact lenses in the laboratory (because lens material may react with chemical vapors and cause serious eye damage)
- Wear a lab coat and ensure that your feet are adequately protected
- Tie or secure long hair
- Never bring food or beverages into the laboratory
- Do not eat, drink, or smoke in the laboratory
- Do not use laboratory equipment for eating, drinking, or personal hygiene
- Never work alone
- Be sure that someone is always within earshot and knows that you are in the laboratory
- Never perform an unauthorized experiment
- Remove all hot objects; hot glass looks just like cold glass
- Use heat resistant gloves or tongs when handling hot objects
- Do not force glass tubing through hole in a stopper
- Wet tubing and hole with soapy water; proceed with caution
- Hold glass tubing close to hole and insert it slowly without excess force
- Wear gloves where possible
- Use a fumehood whenever an experimental procedure makes it necessary
- Ensure that the fumehood is operating properly by testing the air flow with a light piece of paper or thread
- Most laboratories do not permit flushing of dangerous solutions (heavy metal ions, corrosives, reactive or organic materials) down drain
- Follow appropriate waste-chemical disposal policies as provided by the institution
