Labour Market Dynamics In Present Day Germany:

Labour Market Dynamics in Present Day Germany Johannes Schwarze, Friedrich Buttler, Gert Wagner, 1994 **The Dynamics of Full Employment** G_nther Schmid, Bernard Gazier, 2002-01-01 Persistent unemployment is recognized as one of the main mechanisms of social and political exclusion The Dynamics of Full Employment provides a new and fresh approach to the question of full employment in contemporary society It offers an international **Advances in Cross-National Comparison** Jürgen H.P. Hoffmeyer-Zlotnik, Christof Wolf, 2011-06-28 The book consists of five parts and a concluding chapter Part 1 covers general problems and presents solutions for the harmonisation of data from different national and or cultural contexts In the second part EUROSTAT and ESOMAR present their established standard instruments Tested instruments each covering one variable i e occupation education are presented in the third part The fourth part again includes suggested tools for the harmonisation of single variables for which standardised instruments are not yet available i e age religion ethnicity household family income The last part presents selected empirical analyses demonstrating the use and fruitfulness of instruments presented before This book is mainly written for two groups First researchers and practitioners involved in comparative research in Europe Second researchers working with data of the statistical offices of European countries and data from institutions of the European Union **Choosing to Labour?** Wolfgang Lehmann, 2007-08-06 How social class influences the educational decisions and experiences of vocational and academic track youth in Canada and Germany **International Handbook of Education for the Changing World of Work** Rupert Maclean, David Wilson, 2009-06-29 This six volume handbook covers the latest practice in technical and vocational education and training TVET It presents TVET models from all over the world reflections on the best and most innovative practice and dozens of telling case studies The handbook presents the work of established as well as the most promising young researchers and features unrivalled coverage of developments in research policy and practice in TVET **International Bibliography of Economics 1994** British Library of Political and Economic Science at the London School of Economics, 1995 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences Germany: Phoenix in Trouble? Matthias Zimmer, 1997-05 As Germany only recently united approaches the twenty first century it is faced with a variety of political economic and social problems that will put the country to the test **The Roles of Evaluation for Vocational Education and Training** W. Norton Grubb, Paul Ryan, 1999 Focuses on the why and how of evaluation before presenting and assessing the value of a range of evaluation techniques Discusses the use and abuse of evaluation results in policy making particularly in relation to recent trends and issues in vocational education and training such as decentralization a declining role for the State a shift towards work based learning and a concern for issues of equality *Handbook of the Life Course* Jeylan T. Mortimer, Michael J. Shanahan, 2007-12-14 This comprehensive handbook provides an overview of key theoretical

perspectives concepts and methodological approaches that while applied to diverse phenomena are united in their general approach to the study of lives across age phases In surveying the wide terrain of life course studies with dual emphases on theory and empirical research this important reference work presents probative concepts and methods and identifies promising avenues for future research

Barriers to Inclusion Justin J. W. Powell, 2015-12-03 *Barriers to Inclusion* offers a comparative and historical account of the rise of special education over the twentieth century in the United States and Germany This institutional analysis demonstrates how categorical boundaries professional groups social movements and education and social policies shaped the schooling of children and youth with disabilities It traces the evolution of special education classification explores growing special education organizations and examines students learning opportunities and educational attainments Highlighting cross national differences over time the author also investigates demographic and geographic variability within the federal democracies especially in segregation and inclusion rates of disabled and disadvantaged children Germany's elaborate system of segregated special school types contrasts with diverse American special education classrooms mainly within regular schools Joining historical case studies with empirical indicators this book reveals persistent barriers to school integration as well as factors that facilitate inclusive education reform in both societies

Labour Market Policy and Unemployment Jaap Koning, Hugh Mosley, 2001-01-01 This book examines the effectiveness of active labour market policies and their contribution to the prevention of social exclusion The evaluation studies reported in this volume focus on two aspects of active labour market policies that have been relatively neglected in previous research and merit special attention The first part of the book deals with aggregate impact analysis Using examples from France Germany The Netherlands and Spain the contributors attempt to estimate the impact of active labour market policies on the transition from unemployment to employment using aggregate data at the regional level Although quantitative in nature these contributions take into account qualitative aspects such as the socio economic context of the countries concerned and the structure of active labour market policies The book then focuses on implementation issues and includes implementation studies carried out in Germany The Netherlands and Sweden The qualitative element plays a far more important role in these contributions which rely on case studies and surveys in addition to statistical data

Poverty Trends in Germany and Great Britain Jan Brülle, 2018-01-28 Jan Brülle shows how poverty risks in Germany between 1992 and 2012 increased concentrated on those with low educational levels in lower occupational positions and with precarious employment careers as the country's welfare state failed to adapt to widening inequalities in households market incomes Contrasting the German experience with Great Britain where social transfers to low income families in concert with favourable labour market conditions helped to reduce poverty between 1992 and the global financial crisis he presents the most comprehensive comparative study on poverty trends in these two countries to date Moving beyond a cross sectional perspective on poverty the author analyses why it became not only more frequent in Germany but also more persistent in individual life courses and why faster exits

have driven the decline in poverty in Great Britain **Konjunkturpolitik** ,1994 *The German Skills Machine* Pepper D. Culpepper,David Finegold,2001-10-01 In recent years the German economy has grown sluggishly and created few new jobs These developments have led observers to question the future viability of a model that in the past seemed able to combine economic growth competitiveness in export markets and low social inequality This volume brings together empirical and comparative research from across the social sciences to examine whether or not Germany s system of skill provision is still capable of meeting the economic and social challenges now facing all the advanced capitalist economies At issue is the question of whether or not the celebrated German training system an essential element of the high skill high wage equilibrium can continue to provide the skills necessary for German companies to hold their economic niche in a world characterized by increasing trade and financial interdependence Combining an examination of the competitiveness of the German training system with an analysis of the robustness of the political institutions that support it this volume seeks to understand the extent to which the German system for imparting craft skills can adjust to changes in the organization of production in the advanced industrial states Social Stratification Roxanne Connelly,Vernon Gayle,2016-04-01 Research into social stratification and social divisions has always been a central component of sociological study This volume brings together a range of thematically organised case studies comprising empirical and methodological analyses addressing the challenges of studying trends and processes in social stratification This collection has four themes The first concerns the measurement of social stratification since the problem of relating concepts measurements and operationalizations continues to cause difficulties for sociological analysis This book clarifies the appropriate deployment of existing measurement options and presents new empirical strategies of measurement and interpretation The conception of the life course and individual social biography is very popular in modern sociology The second theme of this volume exploits the contemporary expansion of micro level longitudinal data and the analytical approaches available to researchers to exploit such records It comprises chapters which exemplify innovative empirical analysis of life course processes in a longitudinal context thus offering an advance on previous sociological accounts concerned with longitudinal trends and processes The third theme of the book concerns the interrelationship between contemporary demographic institutional and socioeconomic transformations and structures of social inequality Although the role of wider social changes is rarely neglected in sociological reviews such changes continue to raise analytical challenges for any assessment of empirical differences and trends The fourth theme of the book discusses selected features of policy and political responses to social stratification This volume will be of interest to students academics and policy experts working in the field of social stratification **Imbalance** Tobias Schulze-Cleven,Sidney A. Rothstein,2021-03-30 Germany is a central case for research on comparative political economy which has inspired theorizing on national differences and historical trajectories This book assesses Germany s political economy after the end of the social democratic 20th century to rethink its dominant properties and create new opportunities

for using the country as a powerful lens into the evolution of democratic capitalism Documenting large scale changes and new tensions in the welfare state company strategies interest intermediation and macroeconomic governance the volume makes the case for analysing contemporary Germany through the politics of imbalance rather than the long standing paradigm of institutional stability This conceptual reorientation around inequalities and disparities provides much needed traction for clarifying the causal dynamics that govern ongoing processes of institutional recomposition Delving into the politics of imbalance the volume explicates the systemic properties of capitalism multivalent policy feedback and the organizational foundations of creative adjustment as key vantage points for understanding new forms of distributional conflict within and beyond Germany The chapters in this book were originally published as a special issue of *German Politics*

Employment Observatory, 1991 *Social Stratification* Dr Paul Lambert, Ms Roxanne Connelly, Professor Robert M Blackburn, Professor Vernon Gayle, 2013-02-28 Research into social stratification and social divisions has always been a central component of sociological study This volume brings together a range of thematically organised case studies comprising empirical and methodological analyses addressing the challenges of studying trends and processes in social stratification This collection has four themes The first concerns the measurement of social stratification since the problem of relating concepts measurements and operationalizations continues to cause difficulties for sociological analysis This book clarifies the appropriate deployment of existing measurement options and presents new empirical strategies of measurement and interpretation The conception of the life course and individual social biography is very popular in modern sociology The second theme of this volume exploits the contemporary expansion of micro level longitudinal data and the analytical approaches available to researchers to exploit such records It comprises chapters which exemplify innovative empirical analysis of life course processes in a longitudinal context thus offering an advance on previous sociological accounts concerned with longitudinal trends and processes The third theme of the book concerns the interrelationship between contemporary demographic institutional and socioeconomic transformations and structures of social inequality Although the role of wider social changes is rarely neglected in sociological reviews such changes continue to raise analytical challenges for any assessment of empirical differences and trends The fourth theme of the book discusses selected features of policy and political responses to social stratification This volume will be of interest to students academics and policy experts working in the field of social stratification *Education and Work in Great Britain, Germany and Italy* Annette Jobert, Catherine Marry, Helen Rainbird, Lucie Tanguy, 2013-05-13 This volume examines the multiple connections between education broadly defined and work through an analysis of the literature on the transition from school to work on vocational training and on the labour market It shows that concepts such as skill unemployment rates young people and the transition from school to work are socially constructed and are thought about in ways which are nationally specific This book is essential reading for students of European training systems and for those conducting comparative European research *Recent Social Trends in*

West Germany, 1960-1990 Wolfgang Glatzer, Karl Otto Hondrich, 1992-08-21 The thirty year period examined was characterized in West Germany by a number of inconsistent trends While income and consumption levels increased as part of a silent revolution poverty also increased especially during the 1980s People s lifestyles changed with less time spent on formal employment and more on household production and recreation Individualization and pluralization began to dissolve the class structure and social movements such as feminism and environmentalism gained some influence Although hostility toward foreigners did not disappear de facto immigrants were increasingly integrated into society Satisfaction with life reached a generally high and stable level although some people expressed an unanticipated degree of boredom The legitimacy of the political system was not affected by conflicts about income distribution and changing values and cooperation grew among government business and traditional and emerging intermediate groups Special chapters have been authored by Johann Behrens Mathias B s Bernhard Engel Renate Hornung Draus Heiner Meulemann Claudia Koch Arzberger J rgen Kohl Jakob Schissler J rgen Schumacher and Karin Seibel
