The Struggle for Development Benjamin Selwyn, 2017-08-31
 The world economy is expanding rapidly despite chronic economic crises Yet the majority of the world's population live in poverty Why are wealth and poverty two sides of the coin of capitalist development What can be done to overcome this destructive dynamic In this hard hitting analysis Benjamin Selwyn shows how capitalism generates widespread poverty gender discrimination and environmental destruction He debunks the World Bank's dollar a day methodology for calculating poverty arguing that the proliferation of global supply chains is based on the labour of impoverished women workers and environmental ruin Development theories from neoliberal to statist and Marxist are revealed as justifying and promoting labouring class exploitation despite their pro poor rhetoric Selwyn also offers an alternative in the form of labour led development which shows how collective actions by labouring classes whether South African shack dwellers and miners East Asian and Indian Industrial workers or Latin American landless labourers and unemployed workers can and do generate new forms of human development This labour led struggle for development can empower even the poorest nations to overcome many of the obstacles that block their way to more prosperous and equitable lives

The Tangled Brain Dick Pitt, 2009 Part of being human is to learn new ideas reject them or modify them and pass them on What we choose to do with an idea depends on who we are our gender ethnicity earlier ideas what we do for a living etc That is ideas spread to our minds depending on whether they are fit for the environment or not Descent with modification and selection is the central feature of both biological and ideological evolution An evolutionary approach helps us to understand such issues as changes in Christianity over time the mimicry of colonial regimes the cycles of corruption that are followed by purges in the police and business and much more This approach can even shed a light on the belief that the end of the world is nigh However there are major differences between ideological and biological evolution The roles played by consciousness and powerful individuals or groups cannot be ignored The book contains examples that highlight the similarities and differences between biological and ideological evolution We have a rich ideological flora and fauna in our minds Hopefully an understanding of how they got there will help us distinguish between beautiful flowers and pernicious weeds
