**Laboratory Exercises in Microbiology** Robert A. Pollack, Lorraine Findlay, Walter Mondschein, R. Ronald Modesto, 2002-01-22 This is an excellent lab manual, a significant improvement over those currently available. Dr. William H. Coleman, University of Hartford. It is an outstanding laboratory manual. Dr. Van H. Grosse, Columbus State University. I can tell that the author is an experienced microbiologist with knowledge and experience far beyond mine in most areas covered. He/she is also obviously an excellent teacher with explanations far beyond the norm and very helpful tidbits throughout the text. I think this lab manual should fare very well, particularly with the current competition. Professor James Herrick, James Madison University. **Laboratory Exercises in Microbiology** Robert A. Pollack, Lorraine Findlay, Walter Mondschein, R. Ronald Modesto, 2004-10-25 The best feature of this lab manual is its style and organization. It is not just readable; it is thorough. It is comparable to the best lab manuals I have used or read. William Coleman, University of Hartford. It is a friendly to student book, and I think student users will appreciate it even if they don't realize why I think they will like microbiology just a bit more. Loyd J. Hays, University of Texas at San Antonio. Clear, concise, and always engaging. Written specifically for allied health students. Pollack, Findlay, Mondschein, and Modesto's *Laboratory Exercises in Microbiology* 2e focuses on what students need to succeed in the lab: clear, concise, and highly engaging exercises and activities rather than content that is simply adapted from a standard microbiology textbook. Throughout the manual, a variety of interactive activities and experiments convey the basic concepts of microbiology all in a student friendly tone. Students also have the opportunity to explore methods that allow the safe movement or transfer of microbial cells from one type of growth environment to another: classification and identification of microbes, microbial biochemistry, as well as laboratory exercises.
