Logic Of Practice:

The Logic of Practice Pierre Bourdieu, 1990 Our usual representations of the opposition between the civilized and the primitive derive from willfully ignoring the relationship of distance our social science sets up between the observer and the observed In fact the author argues the relationship between the anthropologist and his object of study is a particular instance of the relationship between knowing and doing interpreting and using symbolic mastery and practical mastery or between logical logic armed with all the accumulated instruments of objectification and the universally pre logical logic of practice In this his fullest statement of a theory of practice Bourdieu both sets out what might be involved in incorporating one's own standpoint into an investigation and develops his understanding of the powers inherent in the second member of many oppositional pairs that is he explicates how the practical concerns of daily life condition the transmission and functioning of social or cultural forms The first part of the book *Critique of Theoretical Reason* covers more general questions such as the objectivization of the generic relationship between social scientific observers and their objects of study the need to overcome the gulf between subjectivism and objectivism the interplay between structure and practice a phenomenon Bourdieu describes via his concept of the habitus the place of the body the manipulation of time varieties of symbolic capital and modes of domination The second part of the book *Practical Logics* develops detailed case studies based on Bourdieu's ethnographic fieldwork in Algeria These examples touch on kinship patterns the social construction of domestic space social categories of perception and classification and ritualized actions and exchanges This book develops in full detail the theoretical positions sketched in Bourdieu's *Outline of a Theory of Practice* It will be especially useful to readers seeking to grasp the subtle concepts central to Bourdieu's theory to theorists interested in his points of departure from structuralism especially from Levi Strauss and to critics eager to understand what role his theory gives to human agency It also reveals Bourdieu to be an anthropological theorist of considerable originality and power

The Theory of Practice Shadworth Hollway Hodgson,1870 **Re-Thinking International Relations Theory via Deconstruction**

Badredine Arfi,2013-03-01 International Relations IR theorists have ceaselessly sought to understand explain and transform the experienced reality of international politics Running through all these attempts is a persistent yet unquestioned quest by theorists to develop strategies to eliminate or reduce the antinomies contradictions paradoxes dilemmas and inconsistencies dogging their approaches A serious critical assessment of the logic behind these strategies is however lacking This new work addresses this issue by seeking to reformulate IR theory in an original way Arfi begins by providing a thorough critique of leading contemporary IR theories including pragmatism critical scientific realism rationalism neo liberal institutionalism and social constructivism and then moves on to strengthen and go beyond the valuable contributions of each approach by employing the logic of deconstruction pioneered by Derrida to explicate the consequences of taking into account the dilemmas and inconsistencies of these theories The book demonstrates that the logic of deconstruction is resourceful and rigorous in its questioning of the presuppositions of prevailing IR approaches and argues that relying on deconstruction leads to richer and more powerfully insightful pluralist IR theories and is an invaluable resource for taking IR theory beyond currently paralyzing wars of paradigms Questioning universally accepted presuppositions in existing theories this book provides an innovative and exciting contribution to the field and will be of great interest to scholars of international relations theory critical theory and international relations **Pierre Bourdieu** Richard Jenkins,2002 Where Bourdieu s writings are complex and ambiguous Jenkins is direct concise and to the point This book covers Bourdieu s contributions to theory and methodology plus substantive studies of education social stratification and culture The Work of Communication Timothy

Kuhn, Karen L Ashcraft, Francois Cooren, 2017-07-06 *The Work of Communication Relational Perspectives on Working and Organizing in Contemporary Capitalism* revolves around a two part question What have work and organization become under contemporary capitalism and how should organization studies approach them Changes in the texture of capitalism heralded by social and organizational theorists alike increasingly focus attention on communication as both vital to the conduct of work and as imperative to organizational performance Yet most accounts of communication in organization studies fail to understand an alternate sense of the work of communication in the constitution of organizations work practices and economies This book responds to that lack by portraying communicative practices as opposed to individuals interests technologies structures organizations or institutions as the focal units of analysis in studies of the social and organizational problems occasioned by contemporary capitalism Rather than suggesting that there exists a canonically correct route communicative analyses must follow *The Work of Communication Relational Perspectives on Working and Organizing in Contemporary Capitalism* explores the value of transcending longstanding divides between symbolic and material factors in studies of working and organizing The recognition of dramatic shifts in technological economic and political forces along with deep interconnections among the myriad of factors shaping working and organizing sows doubts about whether organization studies is up to the vital task of addressing the social problems capitalism now creates Kuhn Ashcraft and Cooren argue that novel insights into those social problems are possible if we tell different stories about working and organizing To aid authors of those stories they develop a set of conceptual resources that they capture under the mantle of communicative relationality These resources allow analysts to profit from burgeoning interest in notions such as sociomateriality posthumanism performativity and affect It goes on to illustrate the benefits that investigations of work and organization can realize from communicative relationality by presenting case studies that analyze a the becoming of an idea from its inception to solidification b the emergence of what is taken to be the the product in high tech startup entrepreneurship and c the branding of work in this case academic writing and commercial aviation through affective economies Taken together the book portrays the work of communication as simultaneously about how work in the new economy revolves around communicative practice and about how communication serves as a mode of explanation with the potential to cultivate novel stories about working and organizing Aimed at academics researchers and policy makers this book s goal is to make tangible the contributions of communication for thinking about contemporary social and organizational problems

contexts ranging from public school teaching to medicine and creative industry These pressures are wrought by changing regulatory frameworks changing modes of organising changing demands and changing knowledge authorities in professional practice The authors stress the importance of understanding these relations as sociomaterial webs through which the important moments of professional action and decisions emerge This approach moves us beyond accepting learning as an identifiable individualist phenomenon by emphasising the multiplicities around professional practice standards and quality workarounds responsibility agency and knowledge practices As the chapters here demonstrate sociomaterial perspectives raise new questions and methodologies that can highlight what is often invisible in the sometimes messy dynamics of professional learning and point to new ways of promoting and supporting professional education This book was originally published as a special issue of the Journal of Education and Work
