**The Relevance of Bernard Lonergan's Notion of Self-appropriation to a Mystical-political Theology** Ian B. Bell, 2008 In The Relevance of Bernard Lonergan's Notion of Self Appropriation to a Mystical Political Theology Ian Bell takes on the issue of the separation of the interior and exterior lives that has come to dominate mystical theology over the years The mystical life he claims is necessarily involved in the establishment of social structures and institutions that govern human living and the work of Bernard Lonergan on the human subject provides a means by which the connection between the interior and exterior lives may be established Because human persons operate in a consistent pattern regardless of a given moment's particularities mystical experience is no longer relegated to so called spiritual matters and the insights of mystics may be applied to the Christian call to live as agents of love With this connection in place mystical theology and political theology come together in a theology that is both mystical and political

**Toward Environmental Wholeness** Patrick H. Byrne,2024-03-01 *Toward Environmental Wholeness* proposes a new understanding of environmental wholeness that is needed to address the ethical challenges posed by environmental and climate crises Relying on the studies of numerous historians Patrick H Byrne traces the complex developments in environmental and climate change sciences and how they have posed complex ethical challenges Drawing upon the thought of Bernard Lonergan he shows how seemingly contradictory contributions from diverse ethical traditions can be brought together into a framework for responding to what the developing sciences are telling us about our current situation and evaluating our realistic options Byrne reveals how the limitations of a utilitarian approach to environmental ethics had to be expanded into more holistic approaches and the difficulties those approaches encountered especially the Romantic notions of a pristine unchanging nature to be preserved and humans as alien Environmental and climate change sciences have revealed the complex dynamic natural and human systems that now call for a more dynamic vision of the whole as the basis for environmental ethics The book also examines how the initiatives of Pope Francis *Laudato si* and the United Nations Strategic Development Goals are responding to these challenges
