Losing It William Ian Miller, 2011-10-25 In *Losing It* William Ian Miller brings his inimitable wit and learning to the subject of growing old too old to matter of either rightly losing your confidence or wrongly maintaining it culpably refusing to face the fact that you are losing it The *it* in Miller's *losing it* refers mainly to mental faculties memory processing speed sensory acuity the capacity to focus But it includes other evidence as well sags and flaccidities aches and pains failing joints and organs What are we to make of these tell tale signs Does growing old gracefully mean more than simply refusing unseemly cosmetic surgeries How do we face decline and the final drawing of the blinds Will we know if and when we have lingered too long Drawing on a lifetime of deep study and anxious observation Miller enlists the wisdom of the ancients to confront these vexed questions head on Debunking the glossy new image of old age that has accompanied the graying of the Baby Boomers he conjures a lost world of aging rituals complaints taking to bed resentments of one's heirs schemes for taking it with you or settling up accounts and scores to remind us of the ongoing dilemmas of old age Darkly intelligent and sublimely written this exhilarating and eccentric book will raise the spirits of readers young and old

Forbidden Fruit Richard Ned Lebow, 2010-01-18 Could World War I have been averted if Franz Ferdinand and his wife hadn't been murdered by Serbian nationalists in 1914 What if Ronald Reagan had been killed by Hinckley's bullet Would the Cold War have ended as it did In *Forbidden Fruit* Richard Ned Lebow develops protocols for conducting robust counterfactual thought experiments and uses them to probe the causes and contingency of transformative international developments like World War I and the end of the Cold War He uses experiments surveys and a short story to explore why policymakers historians and international relations scholars are so resistant to the contingency and indeterminism inherent in open ended nonlinear systems Most controversially Lebow argues that the difference between counterfactual and so called factual arguments is misleading as both can be evidence rich and logically persuasive A must read for social scientists *Forbidden Fruit* also examines the binary between fact and fiction and the use of counterfactuals in fictional works like Philip Roth's *The Plot Against America* to understand complex causation and its implications for who we are and what we think makes the social world work

Our Stories John Martin Fischer, 2009-05-06 In this collection of essays on the metaphysical issues pertaining to death the meaning of life and freedom of the will John Martin Fischer argues against the Epicureans that death can be a bad thing for the individual who dies He defends the claim that something can be a bad thing a misfortune for an individual even if he never experiences it as bad and even if he does not any longer exist

Fischer also defends the commonsense asymmetry in our attitudes toward death and prenatal nonexistence we are indifferent to the time before we are born but we regret that we do not live longer Further Fischer argues against the immortality curmudgeons such as Heidegger and Bernard Williams that immortal life could be desirable and shows how the defense of the possible badness of death and the possible goodness of immortality exhibit a similar structure on Fischer's view the badness of death and the goodness of life can be represented on spectra that display certain continuities Building on Fischer's previous book *My Way* a major aim of this volume is to show important connections between issues relating to life and death and issues relating to free will More specifically Fischer argues that we endow our lives with a certain distinctive kind of meaning an irreducible narrative dimension of value by exhibiting free will Thus in acting freely we transform our lives so that our stories matter
