American Architect and Architecture, 1897 *The Architectural Review*, 1902 *The Country Houses of John F. Staub* Stephen Fox, 2007. This ambitious study of Staub's work by architectural historian Stephen Fox goes beyond a description of Staub's houses. Fox analyzes the roles of space, structure, and decoration in creating, defining, and maintaining social class structures and expectations and shows how Staub was able to incorporate these elements and understandings into the elegant buildings he designed for his clients. In the process, he contributes greatly to a fuller understanding of Houston's emergence as a premier American city. **BOOK JACKET** **American Architect and the Architectural Review**, 1902 *The American School Board Journal* William George Bruce, William Conrad Bruce, 1902 **American Stone Trade Architecture**, 1916 **The Inland Architect and News Record**, 1885 **Progressive Architecture**, 1968

A Field Guide to American Houses Virginia Savage McAlester, 2015-07-29. The fully expanded, updated, and freshly designed second edition of the most comprehensive and widely acclaimed guide to domestic architecture in print since its original publication in 1984 and acknowledged everywhere as the unmatched essential guide to American houses. This revised edition includes a section on neighborhoods, expanded and completely new categories of house styles with photos and descriptions of each, an appendix on Approaches to Construction in the 20th and 21st Centuries, an expanded bibliography, and 600 new photographs and line drawings. *Houses from Books* Daniel D. Reiff, 2010-11-01. Many homes across America have designs based on plans taken from pattern books or mail order catalogs. In *Houses from Books*, Daniel D. Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950. *Houses from Books* shows that architectural publications from Palladio's *I Quattro Libri* to Aladdin's Ready-Cut Homes played a decisive role in every aspect of American domestic building. Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country. His book also offers a wide-ranging analysis of the economic and social conditions shaping American building practices. As architectural publication developed and grew more sophisticated, it played an increasingly prominent part in the design and the construction of domestic buildings. In villages and small towns which often

did not have professional architects the publications became basic resources for carpenters and builders at all levels of expertise Through the use of published designs they were able to choose among a variety of plans styles and individual motifs and engage in a fruitful dialogue with past and present architects Houses from Books reconstructs this dialogue by examining the links between the published designs and the houses themselves Reiff s book will be indispensable to architectural historians architects preservationists and regional historians Realtors and homeowners will also find it of great interest A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design Houses from Books contains a wealth of photographs many by the author that enhance its importance as a history and guide
