Key Papers on Countertransference Liliane Abensour, Claudio Laks Eizirik, Robert Michels, Richard Rusbridger, 2019-07-23 The International Journal of Psychoanalysis Key Papers Series brings together the most important psychoanalytic papers in the journal's eighty year history in a series of accessible monographs Approaching the IJP's intellectual resources from a variety of perspectives the monographs highlight important domains of psychoanalytic enquiry The papers in this volume were commissioned with a view to describing the current views of countertransference and their historical evolution in four intellectual communities of psychoanalysis North America Britain France and Latin America Psychoanalysis is still sometimes described as a monolithic and unchanging theory and practice These papers vividly contradict such a view through their close study of the evolution of the concept of countertransference from the periphery of psychoanalysis to its current position of central importance in most analytic communities In doing so they provide a window of the development of a living and evolving discipline during its first one hundred years From the Introduction by Richard Rusbridger

Countertransference in Psychotherapy with Children and Adolescents Jerrold R. Brandell, 1992 Countertransference was believed at one time to consist of the subjective reactions of

the therapist whose own unresolved conflicts had been reactivated by the patient's transference. More recently however it has been recast to include the totality of the therapist's attitudes, fantasies and emotional reactions to the patient. While this important topic has received increased attention in the mental health literature in recent years little attention has been paid to countertransference encountered in child and adolescent psychotherapy. This book focuses on countertransference in the psychotherapy of children and adolescents in detail. It offers the child and adolescent therapist an invaluable opportunity to explore countertransference in substantial depth and in a variety of clinical encounters across the wide spectrum of child and adolescent psychopathology. Perhaps most importantly it normalizes the topic of transference in the psychotherapy of children and adolescents and in so doing highlights the clinician's subjective experience as central to the process of psychotherapy.

Countertransference Athina Alexandris, Grigoris Vaslamatzis, 2018-03-26 A collection of papers on the Oedipus complex divided into three parts: theory, practice and supervision. The contributors who include Joyce McDougall, Hanna Segal, Otto Kernberg and Leon Grinberg invite the reader to explore with them the processes affecting the therapist's mind and occasionally his body during psychoanalytic therapy and the reasons why the therapist thinks, feels and reacts in a particular way. The full significance of these processes referred to as countertransference since Freud's time has recently been recognized, resulting in the therapist's use of additional resources so that he or she can understand and help the patient more effectively. In the 1950s and 1960s Paula Heimann and Heinrich Racker following on Freud's own observations made important contributions to the study of the countertransference considerably enlarging upon the concept and re-evaluating the nature of the psychoanalytic therapeutic relationship as a result.

Bellman,2018-05-08 Since Freud's initial papers on transference and countertransference these vast and inexhaustible subjects have occupied psychoanalysts Transference and countertransference the essence of the patient analyst relationship are concepts so central to psychoanalysis that to our minds they transcend theoretical orientation and thus can be seen as a unifying focus of psychoanalysis However differently theoretical traditions conceptualize the transference or disagree as to when and how to interpret it in our everyday analytic work we all embrace the phenomenon as vital to psychic change

Countertransference in Perspective Dov R. Aleksandrowicz, Anna O. Essential Papers on Transference Aaron H. Esman, 1990-09 A collection of central papers on transference the psychoanalytic phenomenon of adult repetition of childhood experiences Among Freud's discoveries none has proved more theoretically valid or clinically productive than his demonstration that humans regularly and inevitably repeat with the analyst patterns of relationship fantasy and conflict experienced in their childhood Transference phenomenon and its analysis in therapy is the cornerstone for much psychoanalytic work Its crucial importance has been and continues to be a matter of debate among psychoanalysts Essential Papers on Transference presents the central papers on the subject of transference from Freud's time to our own Although many reflect viewpoints within the psychoanalytic mainstream efforts have been made to be as inclusive as possible thus neo Freudian Kohutian and Lacanian statements are represented The book underscores the fact that the meaning the therapeutic use and even the theoretical explanation of transference and transference phenomena have undergone significant changes over the years

Coasting in the Countertransference Irwin Hirsch, 2011-02-25 Winner of the 2009 Goethe Award for

Psychoanalytic Scholarship Irwin Hirsch author of *Coasting in the Countertransference* asserts that countertransference experience always has the potential to be used productively to benefit patients However he also observes that it is not unusual for analysts to coast in their countertransferences and to not use this experience to help treatment progress toward reaching patients and analysts stated analytic goals He believes that it is quite common that analysts who have some conscious awareness of a problematic aspect of countertransference participation or of a mutual enactment nevertheless do nothing to change that participation and to use their awareness to move the therapy forward Instead analysts may prefer to maintain what has developed into perhaps a mutually comfortable equilibrium in the treatment possibly rationalizing that the patient is not yet ready to deal with any potential disruption that a more active use of countertransference might precipitate This coasting is emblematic of what Hirsch believes to be an ever present and rarely addressed conflict between analysts self interest and pursuit of comfortable equilibrium and what may be ideal for patients achievement of analytic aims The acknowledgment of the power of analysts self interest further highlights the contemporary view of a truly two person psychology conception of psychoanalytic praxis Analysts embrace of their selfish pursuit of comfortable equilibrium reflects both an acknowledgment of the analyst as a flawed other and a potential willingness to abandon elements of self interest for the greater good of the therapeutic project
