Key Terms in Art, Craft and Design John Skull, 1990 **Art, Design, Craft, Beauty and All Those Things...** Donald Richardson, 2023-08-18 Responding to many recent calls for redress and restitution Richardson summarises the historical and current situation and attributes its problematics to the fact that theorists and historians have taken the concept art as a generic that includes both design and craft which are actually and validly distinguishable from art by application of the concept functional or else ignored the two entirely Considering the concept functional he maintains calls into question the view that the three may be sub classes of the one class whereas in a work of art typically there is a resolution of the tension between form and content in works of design and craft the resolution is between form and function How this recognition can clarify the issue informs the entire book The book's other major thesis is the realisation that aesthetic values are inherently human and that therefore they apply not only to art but to life in general Far from being frivolous or a mere emotion the aesthetic is a sense of equivalent psychic status to sight and hearing and like them is employed at almost every moment of our daily lives which fact grounds art design and craft deeply in human life This is reflected in the universal use of the human form including the exhibition of sexual characteristics in art The eternal conflict between making art and making a living from making art is examined and contrasted to the rarely recognised but positive role of design in planning and industry Richardson also critiques common theories of representation and composition including creativity Albertian perspective and scientific and geometric theories of beauty and composition also the relevance of the camera and the computer in the field
