Laboratory Studies In Earth History:

Laboratory Studies in Earth History James Coble Brice, Harold Leonard Levin, Michael S. Smith, 1989 Utilizing actual case studies and field photographs this successful lab manual covers the full spectrum of historical geology sediments plate tectonics paleontology and petrology in flexible self contained units This manual has been developed for use in both nonmajors and combined courses in historical geology The exercises emphasize the principles and methods by which geologists discover the origins and changing nature of our planet These exercises or studies will help students understand how ancient conditions can be read from rocks and fossils how geologic forces at the surface and within the planet can alter the environment and how events of the past can be placed within an integrated chronological sequence The exercises are designed for students who may not intend to specialize in geology This does not mean however that the treatment is superficial nor that it cannot give adequate preparation for students pursuing an academic major in the earth sciences

Brice, Harold L. Levin, Michael S. Smith, 1992 For most students reading from a textbook provides only a framework of knowledge The more comprehensive and perceptive grasp of a topic truly requires that one examines and

answers thought provoking questions and seeks solutions to meaningful problems The authors goal in these studies is to provide such questions and pose such problems They hope the exercises will help students understand how ancient conditions can be read from rocks and fossils how geologic forces at the surface and within the planet can alter the environment and change world geography and how events of the past can be placed within an integrated chronological sequence The exercises are designed for students who may not intend to specialize in geology Pref *Laboratory Studies in Earth History* James Coble Brice, Harold L.
