**Financial Crisis, Labour Markets and Institutions** Sebastiano Fadda,Pasquale Tridico,2013 This book seeks to explain the global financial crisis and its wider economic political and social repercussions arguing that the 2007 9 meltdown was in fact a systemic crisis of the capitalist system The volume makes these points through the exploration of several key questions What kind of institutional political economy is appropriate to explain crisis periods and failures of crisis management Are different varieties of capitalism more or less crisis prone and can the global financial crisis can be attributed to one variety more than others What is the interaction between the labour market and the financialization process The book argues that each variety of capitalism has its own specific crisis tendencies and that the uneven global character of the crisis is related to the current forms of integration of the world market More specifically the 2007 09 economic crisis is rooted in the uneven income distribution and inequality caused by the current financial led model of growth The book explains how the introduction of more flexibility in the labour markets and financial deregulation affected everything from wages to job security to trade union influence Uneven income distribution and inequality weakened aggregate demand and brought about structural deficiencies in aggregate demand and supply It is argued that the process of financialization has profoundly changed how capitalist economies operate The volume posits that financial globalization has given rise to growing international imbalances which have allowed two growth models to emerge a debt led consumption growth model and an export led growth model Both should be understood as reactions to the lack of effective demand due to the polarization of income distribution

**The State and the Labor Market** Samuel Rosenberg,2012-12-06 In the two decades before the mid 1970s macroeconomic policies in Western Europe were frequently accompanied by policies of direct wage restraint in the pursuit of acceptable levels of employment inflation and international competitiveness The same period witnessed a proliferation of social welfare programs elements of which were sometimes commingled with demand management and pay policies in trilateral bargaining processes involving gov ernments unions and employers In the wake of such subsequent develop ments as the oil price shocks sharply intensified international competition and slowing of growth rates in productivity however governments resorted more frequently to deflationist macroeconomic policies and also to policies aimed directly at increasing Iflexibility in wage determination and the de ployment of labor by the firm It is a major theme of this very interesting book that these labor market policies have not been demonstrably or at least sufficiently effective in com bating the high rates of unemployment which have been prevalent in most of the countries of Western Europe since the late 1970s This theme emerges from the chapters on labor market developments and policies in six countries of Western Europe the United States and Hungary a welcome addition to this type of scholarship as well as another set of chapters devoted to specific policy areas In effect Samuel Rosenberg and his colleagues an interna tional team of nineteen economists and sociologists are repeating in con crete terms a sermon preached by Keynes over a half century ago
