Logic A Dialogue:

Logic : a dialogue Arthur Kalmer Bierman,1966 *Meaning in Dialogue* James Trafford,2016-10-24 This book argues for a view in which processes of dialogue and interaction are taken to be foundational to reasoning logic and meaning This is both a continuation and a substantial modification of an inferentialist approach to logic As such the book not only provides a critical introduction to the inferentialist view but it also provides an argument that this shift in perspective has deep and foundational consequences for how we understand the nature of logic and its relationship with meaning and reasoning This has been upheld by several technical results including for example a novel approach to logical paradox and logical revision and an account of the internal justification of logical rules The book shows that inferentialism is greatly strengthened such that it can answer the most stringent criticisms of the view This leads to a view of logic that emphasizes the dynamics of reasoning provides a novel account of the justification and normativity of logical rules thus leading to a new attractive approach to the foundations of logic The book addresses readers interested in philosophy of language philosophical and mathematical logic theories of reasoning and also those who actively engage in current debates involving for example logical revision and the relationship between logic and reasoning from advanced undergraduates to professional philosophers mathematicians and linguists *The Logic of Dialogue* Douglas N. Commitment in Dialogue Douglas Walton, Erik C. W. Krabbe, 1995-08-10 This book develops a logical analysis of dialogue in which two or more parties attempt to advance their own interests It includes a classification of the major types of dialogues and a discussion of several important informal fallacies The authors define the concept of commitment in a way that makes it useful in evaluating arguments In traditional logic a proposition is either true or false and that is the end of it In this new framework an arguer can be held to his or her commitments in some cases but in other cases he or she can retract them without violating any rule of the dialogue Commitment in Dialogue studies the conditions under which commitments should be held or may be retracted within an argument

Sticht,2018-10-17 *The Pleadings Game* Thomas F. Gordon,2013-03-09 The British philosopher Stephan Toulmin in his *The Uses of Argument* made the provocative claim that logic is generalized jurisprudence For Toulmin logic is the study of nonns for practical argumentation and decision making In his view mathematical logicians were preoccupied with formalizing the concepts of logical necessity consequence and contradiction at the expense of other equally important issues such as how to allocate the burden of proof and make rational decisions given limited resources He also considered it a mistake to look primarily to psychology linguistics or the cognitive sciences for answers to these fundamentally nonnative questions Toulmin s concerns about logic writing in the 1950 s are equally applicable to the field of Artificial Intelligence today The mainstream of Artificial Intelligence has focused on the analytical and empirical aspects of intelligence without giving adequate attention to the nonnative regulative functions of knowledge representation problem solving and decision making Nonnative issues should now be of even greater interest with the shift in perspective of AI from individual to collective intelligence in areas such as multi agent systems cooperative design distributed artificial intelligence and computer supported cooperative work Networked virtual societies of humans and software agents would also require virtual legal systems to fairly balance interests resolve conflicts and promote security **Informal Fallacies** Douglas N. Walton,1987-01-01 The basic question of this monograph is how should we go about judging arguments to be reasonable or unreasonable Our concern will be with argument in a broad sense with realistic arguments in natural language The basic object will be to engage in a normative study of determining what factors standards or procedures should be adopted or appealed to in evaluating an argument as

good not so good open to criticism fallacious and so forth Hence our primary concern will be with the problems of how to criticize an argument and when a criticism is reasonably justified **Fallacies** John Woods,Douglas Walton,2019-11-18 No detailed description available for Fallacies *Manifest Rationality* Ralph H. Johnson,2012-11-12 This book works through some of the theoretical issues that have been accumulating in informal logic over the past 20 years At the same time it defines a core position in the theory of argument in which those issues can be further explored The underlying concern that motivates this work is the health of practice of argumentation as an important cultural artifact A further concern is for logic as a discipline Argumentative and dialectical in nature this book presupposes some awareness of the theory of argument in recent history and some familiarity with the positions that have been advanced It will be of interest to academics researchers and advanced undergraduate and graduate students in the disciplines of logic rhetoric linguistics speech communication English composition and psychology Analysis, Design and Evaluation of Man - Machine Systems G.
