Logic Of Choice:

Logic of Choice and Economic Theory Sidney N. Afriat, 1987 **The Logic of Choice** Gidon Gottlieb, 2019-10-30
Originally published in 1968 This is a critical study of the concept of rule featuring in law ethics and much philosophical analysis which the author uses to investigate the concept of rationality The author indicates in what manner the modes of reasoning involved in reliance upon rules are unique and in what fashion they provide an alternative both to the modes of logico mathematical reasoning and to the modes of scientific reasoning This prepares the groundwork for a methodology meeting the requirements of the fields using rules such as law and ethics which could be significant for communications theory and the use of computers in normative fields Other substantive issues related to the mainstream of legal philosophy are discussed theories of interpretation the notion of purpose and the requirements of principled decision making The book utilizes examples drawn from English and American legal decisions to suggest how the positions of legal positivism and of natural law are equally artificial and misleading **Being at Genetic Risk** Kelly Pender, 2018-10-04 Rhetorics of choice have dominated the biosocial discourses surrounding BRCA risk for decades telling women at genetic risk for breast and ovarian cancers that they are free to choose how and whether to deal with their risk Critics argue that women at genetic risk are in fact not free to choose but rather are forced to make particular choices In *Being at Genetic Risk* Kelly Pender argues for a change in the conversation around genetic risk that focuses less on choice and more on care *Being at Genetic Risk* offers a new set of conceptual starting points for understanding what is at stake with a BRCA diagnosis and what the focus on choice obstructs from view Through a praxiographic reading of the medical practices associated with BRCA risk Pender's analysis shows that genetic risk is not just something BRCA women know but also something that they do It is through this doing that genetic cancer risk becomes a reality in their lives one that we can explain but not one that we can explain away Well researched and thoughtfully argued *Being at Genetic Risk* will be welcomed by scholars of rhetoric and communication particularly those who work in the rhetoric of science technology and medicine as well as scholars in allied fields who study the social ethical and political implications of genetic medicine Pender's insight will also be of interest to organizations that advocate for those at genetic risk of breast and ovarian cancers **Logic of Choice and Economic Theory** , **The Logic of Care** Annemarie Mol, 2008-05-24 Shortlisted for the BSA Sociology of Health and Illness Book Prize 2010 What is good care In this innovative and compelling book Annemarie Mol argues that good care has little to do with patient choice and therefore creating more opportunities for patient choice will not improve health care Although it is possible to treat people who seek professional help as customers or citizens Mol argues that this undermines ways of thinking and acting crucial to health care Illustrating the discussion with examples from diabetes clinics and diabetes self care the book presents the logic of care in a step by step contrast with the logic of choice She concludes that good care is not a matter of making well argued individual choices but is something that grows out of collaborative and continuing attempts to attune knowledge

and technologies to diseased bodies and complex lives Mol does not criticise the practices she encountered in her field work as messy or ad hoc but makes explicit what it is that motivates them an intriguing combination of adaptability and perseverance The Logic of Care Health and the problem of patient choice is crucial reading for all those interested in the theory and practice of care including sociologists anthropologists and health care professionals It will also speak to policymakers and become a valuable source of inspiration for patient activists

Agreement Technologies Carlos I. Chesnevar, Eva Onaindia de la Rivaherrera, Sascha Ossowski, George Vouros, 2013-07-11 This volume constitutes the refereed proceedings of the Second International Conference on Agreement Technologies AT 2013 held in Beijing China in August 2013 The 15 revised full papers presented together with two invited talks were carefully reviewed and selected from numerous submissions and focus on topics such as semantic technologies normative multiagent systems virtual organisations and electronic institutions argumentation and negotiation trust and reputation applications of agreement technologies agreement technologies architectures environments and methodologies as well as interdisciplinary foundations of agreement technologies

Administrative Justice in Context Michael Adler, 2010-04-30 This book comprises a definitive collection of papers on administrative justice written by a set of very distinguished contributors It is divided into five parts each of which contains articles on a particular aspect of administrative justice The first part deals with the impact of contextual changes on administrative justice and considers the implications of changes in governance and public administration management and service delivery information technology audit and accounting and human rights for administrative justice The second part deals with conceptual issues and describes a number of competing approaches to the administrative justice The third part deals with the application of administrative justice principles to private law disputes while the fourth part deals with the distinctive characteristics of administrative justice in three other jurisdictions The final part deals with current developments in administrative justice and the book concludes with a discussion of legislative and policy developments in the UK The general approach of the book is socio legal and interdisciplinary The chapters adopt a variety of disciplinary perspectives including those derived from political science public policy social policy accounting and information technology as well as from law Although most of the contributors are academics some are practitioners For these reasons the book should be of interest to lawyers particularly those with interests in administrative law and to social scientists particularly those with interests in public administration public policy and public management

Ultralogic as Universal? Richard Routley, 2019-05-08 Ultralogic as Universal is a seminal text in non classical logic Richard Routley Sylvan presents a hugely ambitious program to use an ultramodal logic as a universal key which opens if rightly operated all locks It provides a canon for reasoning in every situation including illogical inconsistent and paradoxical ones realized or not possible or not A universal logic Routley argues enables us to go where no other logic especially not classical logic can Routley provides an expansive and singular vision of how a universal logic might one day solve major problems in set theory arithmetic linguistics

physics and more It circulated in typescript in the late 1970s before appearing as the Appendix to Exploring Meinong's Jungle and Beyond With engaging forceful prose unsparing criticism of entrenched institutions and many tantalizing proof sketches is the Axiom of Choice a theorem of naive set theory Ultralogic has had a major influence on the development of paraconsistent and relevant logic This new edition makes this work available for a modern audience newly typeset and corrected along with extensive notes and new commentary essays Emotions and Values in Equity Crowdfunding Investment Choices 1 Christian Goglin, 2021-02-17 Equity crowdfunding is a new way for seed stage start ups to generate initial capital and as such raises questions around the choices made by investors within this area Understanding it is important for investor protection as investors are generally unaware of the factors that can influence their decisions However investing in equity crowdfunding places the investor in a unique decision making framework in which resources such as images videos and storytelling are all mobilized by entrepreneurs and platforms as tools of persuasion This context thus seems to favor more holistic and emotional decision making rather than a process that is rational and analytical This first volume centers on the emotional and axiological determinants of choice A transdisciplinary theoretical analysis is carried out combining different fields within the social sciences primarily finance marketing and psychology This state of the art leads to the emergence of an original theoretical framework for understanding investment choices in equity crowdfunding

Unsettling Choice Ujju Aggarwal, 2024-03-05 How the Great Recession revealed a system of school choice built on crisis precarity and exclusion What do universal rights to public goods like education mean when codified as individual private choices Is the problem of school choice actually not about better choices for all but rather about the competition and exclusion that choice engenders guaranteeing a system of winners and losers Unsettling Choice addresses such questions through a compelling ethnography that illuminates how one path of neoliberal restructuring in the United States emerged in tandem with and in response to the Civil Rights movement Drawing on ethnographic research in one New York City school district Unsettling Choice traces the contestations that surfaced when in the wake of the 2007-2009 Great Recession public schools navigated austerity by expanding choice based programs Ujju Aggarwal argues that this strategy positioned as saving public schools mobilized mechanisms rooted in market logics to recruit families with economic capital on their side thereby solidifying a public sphere that increasingly resembled the private where contingency was anticipated and rights for some were marked by intensified precarity for poor and working class Black and Latinx families As Unsettling Choice shows these struggles over public schools one of the last remaining universal public goods in the United States were entrapped within neoliberal regimes that exceeded privatization and ensured exclusion even as they were couched in language of equity diversity care and rights And yet this richly detailed and engaging book also tracks an architecture of expansive rights care and belonging built among poor and working class parents at a Head Start center whose critique of choice helps us understand how we might struggle for and reimagine justice and a public that remains to be won Retail e book files for this

Henri Poincaré's The Foundations of Science Science and Hypothesis The Value of Science Science and Method is a profound exploration of the philosophical underpinnings of scientific inquiry Poincaré delves into the nature of scientific theories emphasizing the role of hypothesis in the scientific method and the interplay between observation and mathematical formulation His engaging prose marked by clarity and rigor situates these discussions within the broader intellectual currents of early 20th century science where emerging theories in physics and mathematics challenged traditional epistemologies This collection seeks to bridge the gap between empirical observations and abstract concepts encouraging a critical examination of what constitutes scientific knowledge Henri Poincaré a formidable mathematician and physicist is often regarded as a pioneer in various fields including topology and celestial mechanics His

interdisciplinary approach reflects a deep engagement with both the scientific and philosophical dimensions of existence. Experiences such as challenging the prevailing Newtonian framework likely informed his critical outlook on science, leading him to articulate a broader understanding of its foundations that continues to resonate with contemporary debates about the nature of scientific explanation. *The Foundations of Science* is an essential read for anyone interested in the philosophical implications of scientific thought. Poincaré's insights provide invaluable perspectives for scientists, philosophers, and scholars alike, inviting readers to reflect on the underlying principles that govern our understanding of the natural world.

The Top Books of the Year Logic Of Choice The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have captivated audiences this year. Logic Of Choice : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Logic Of Choice : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
