- Any *modus tollens* argument is a like that
  - Why do we say the *Euthyphro* argument was *modus tollens*?
  - Because it looks like this:

## **Logic Matters:**

Logic Matters Peter Thomas Geach,1972      **Logic Matters** P. T. Geach,B. Geach,1980-04-30 This is a significant and often rather demanding collection of essays It is an anthology putting together the uncollected works of an important twentieth century philosopher Many of the articles treat one or another of the more important issues considered by analytic philosophers during the last quarter century Of significant importance to philosophers interested in researching the many topics contained in *Logic Matters* is the inclusion in this anthology of a rather extensive eight page name topic index Thomist The papers are arranged by topic Historical Essays Traditional Logic Theory of Reference and Syntax Intentionality Quotation and Semantics Set Theory Identity Theory Assertion Imperatives and Practical Reasoning Logic in Metaphysics and Theology The broad range of issues that have engaged Geach's complex and systematic reasoning is impressive In addition to classical logic topics in ethics ontology and even the logic of religious dogmas are tackled the work in this collection is more brilliant and ingenious than it is difficult and demanding Philosophy of Science Geach displays his mastery of applying logical techniques and concepts to philosophical questions Compared with most works in philosophical logic this book is remarkable for its range of topics Plato Aristotle Aquinas Russell Wittgenstein and Quine all figure prominently Geach's style is remarkably lively considering the rightly argued matter Although some of the articles treat rather technical questions in mathematical logic most are accessible to philosophers with modest backgrounds in logic Choice      *Logical Matters* Jonathan Barnes,2012-12-13 This volume presents 27 essays on logic in ancient philosophy by Jonathan Barnes one of the most admired philosophers of his generation He explores the thought of Galen Cicero Aristotle Epicurus and Boethius amongst others This is the second volume of Barnes *Essays in Ancient Philosophy* a rich feast for students and scholars alike

Epistemic Logic, Deontic Logic, and Other Logical Matters Andrzej Wiśniewski,Jan Zygmunt,1997      Proof and Falsity Nils Kürbis,2019-05-09 This book argues that the meaning of negation perhaps the most important logical constant cannot be defined within the framework of the most comprehensive theory of proof theoretic semantics as formulated in the influential work of Michael Dummett and Dag Prawitz Nils Kürbis examines three approaches that have attempted to solve the problem defining negation in terms of metaphysical incompatibility treating negation as an undefinable primitive and defining negation in terms of a speech act of denial and concludes that they cannot adequately do so He argues that whereas proof theoretic semantics usually only appeals to a notion of truth it also needs to appeal to a notion of falsity and proposes a system of natural deduction in which both are incorporated Offering new perspectives on negation denial and falsity his book will be important for readers working on logic metaphysics and the philosophy of language

**Language and Human Understanding** David Braine,2014-02-03 Philosopher psychologist and linguist are all concerned with natural language Accordingly in seeking a unified view Braine draws on insights from all these fields sifting through the discordant schools of linguists He concludes that one extended logic or integrated semantic syntax shapes grammar but without constricting

languages to being of one grammatical type      *Reference and Identity in Jewish, Christian, and Muslim Scriptures* D. E. Buckner, 2020-07-08 In *Reference and Identity in Jewish Christian and Muslim Scriptures* The Same God D E Buckner argues that all reference is story relative We cannot tell which historical individual a person is talking or writing about or addressing in prayer without familiarity with the narrative oral or written which introduces that individual to us so we cannot understand reference to God nor to his prophets nor to any other character mentioned in the Jewish Christian or Muslim scriptures without reference to those very scriptures In this context we must understand God as the person who walked in the garden in the cool of the day Gen 3 8 and who is continuously referred to in the books of the Hebrew Bible and New Testament as well as the Quran Further developing ideas presented by the late Fred Sommers in his seminal *The Logic of Natural Language* Buckner argues that singular reference and singular conception is empty outside such a context      **Sense and Contradiction: A Study in Aristotle** R.M. Dancy, 1975-06-30 This study began as a paper It got out of hand It had help doing that Oswald Chateaubriand Ronald Haver Paul Horwich Bernie Katz Norman Kretzmann Stanley Martens Stephen Pink Michael Stokes Eleanor Stump Bill Ulrich Celia Wolf and a lot of other people questioned or criticized or helped reformulate one or another of the arguments and interpretations along the way In spite of maybe partly because of their efforts the book is full of mistakes At least induction over previous drafts indicates that irresistibly But I do not right now know of any particular mistakes All but a couple of the translations are mine the exceptions are noted That is not because existing translations are bad but because some uniformity was essential The translations often make unpleasant reading So often does Aristotle I have tried to be literal A text and translation of the passage on which the book centers is in Appendix III Footnotes cite literature by author and sometimes abbreviated title Details are in the bibliography I do not profess to have covered all the literature An enormous amount of editorial work was done by Margaret Mundy She was not able to undo the errors that remain In particular the footnotes are often numbered oddly 4 4a 4b etc      **Empty Representations** Manuel García-Carpintero, Genoveva Martí, 2014 The contents of linguistic and mental representations may seem to be individuated by what they are about But a problem arises with regard to representation of the non existent words and thoughts that are about things that don't exist Fourteen new essays get to grips with this much debated problem      **Logic ...** Alexander Bain, 1889      Logic: Deductive and Inductive Alexander Bain, 1889      **The Philosophical Presuppositions of Mathematical Logic** Harold Robert Smart, 1925      Deduction Alexander Bain, 1910      International University Lectures: Psychology. Chemistry. Astronomy. Physics. Metaphysics. Logic. Ethnics. Mathematics. Utilitarian science. Medicine , 1909      *The Logic of Religious Thought* Robert Gordon Milburn, 1929      *The Logic of Hegel*, Georg Wilhelm Friedrich Hegel, 1904      The Journal of Philosophy, Psychology and Scientific Methods , 1909      The British Controversialist and Literary Magazine , 1872      **Science** John Michels (Journalist), 1913      History of the Congress. Scientific plan of the Congress. Philosophy and mathematics Howard Jason Rogers, 1905
