Race, Gender, and the History of Early Analytic Philosophy Matt LaVine, 2020-06-15 Although what we now call analytic philosophy has been around at least since the turn of the twentieth century it wasn't until the latter half of the twentieth century that it became the dominant mode of philosophizing in the Western world In Race Gender and the History of Early Analytic Philosophy Matt LaVine argues that the changes associated with this shift from early analytic philosophy a revolutionary movement to later analytic philosophy the hegemon have not been sufficiently recognized While a significant portion of the analytic philosophy of the late 1900s was apolitical and conservative LaVine argues that there is much to gain by thinking of early analytic philosophy in relation to liberatory and emancipatory political aims In particular there is great potential in bringing together inquiry into critical theories of race and gender with inquiry into analytic philosophy LaVine supports this idea by discussing the philosophy of language and logic in relation to the Black Lives Matter movement the objectification of women and more Furthermore LaVine argues there is more precedent for this type of work in the history of early analytic philosophy in particular in the work of G E Moore Susan

Ibrahim,2023-02-13 This book examines the intimate relationship between race and technologies and how digital platforms reabsorb racism as an internal arrangement within its modes of technical and affective architecture Premising the idea that technologies supplant and mirror the logic of racialization as mimetic instruments of social control and violence the book interrogates the present arrangement of platform capital and its modes of re abstraction of race into its fibres and terrains of

re territorialization of the human spheres of social economic and political life If capitalism reframed and consolidated racialization through its re territorialization and primitive accumulation producing continuities from colonization and imperialism platformization and digital capital redrafts and redistributes its racial logic in new modes of reassembling social and economic life through data machine learning algorithms software designs and in tandem its automaticity In learning refining and accelerating its enterprise through the mimetic violence of producing difference racism in the digital age calibrates intimately with power Western rationality and the ubiquity of technologies within the everyday If the non hominization of alterity relied on discoveries of science and its conflation with truth and White supremacy the sustained production and oppression of the inferior other co opted automaticity and technologies reiterating our fascination with and our understanding of human progress as pegged to machines as entities working in excess of human cognition and comprehension connecting and responding to its ambient intelligence despite its material absence The book underpins the configuration of power and White supremacy through its co enterprise with technologies seeks to provide an alternative and decolonial approach to technology studies particularly new media and digital technological advancements leveraging on the notion of the digital age as an era of acceleration of difference experimentation and the production of alterity through overt and covert modes of surveillance image recognition software and algorithms which work in complicity with racial capital

Soccer's Neoliberal Pitch John M. Sloop, 2023-05-23 American sports agnostics might raise an eyebrow at the idea that soccer represents a staging ground for progressive cultural social and political possibility within the United States It is just another game after all in a society where mass audience spectator sport largely avoids any political stance in other than a generic corporate friendly patriotism But John Sloop picks up on the work of Laurent Dubois and others to see in American soccer a sport that has achieved immense participation and popularity even as it struggles to establish major league status a game that permits surprisingly diverse modes of thinking about national identity because of its marginality As a rhetorician who engages with both critical theory and culture John Sloop seeks to read soccer as the game intersects with gender race sexuality class and the logic of neoliberal values The result of this engagement is a sense of both enormous possibility and real constraint If American soccer offers more possibility because of its marginality looking at how these cultural social and political possibilities are closed off or constrained can provide valuable insights into American culture and values In *Soccer's Neoliberal Pitch* Sloop analyzes a host of soccer adjacent case studies the equal pay dispute between the US women's national team and the US Soccer Federation the significance of hooligan literature the introduction of English soccer to American TV audiences the strange invisibility of the Mexican soccer league despite its consistent high TV ratings and the reading of US national teams as underdogs despite the nation's quasi imperial dominance of the Western hemisphere While there is a growing bookshelf of titles on soccer and a growing number on American soccer *Soccer's Neoliberal Pitch* is the first and only book length analysis of soccer through a rhetorical lens This book is a model for critical cultural work with

sports with appeal to not only sports studies but cultural studies communication and even gender studies classrooms It is independent of its bona fides an engaging and enjoyable read for the soccer fan and the soccer curious **Contesting**
