

Logical Positivism is a form of Empiricism

Rationalist

Thought is an independent source of knowledge.

Empiricist

No! All factual knowledge comes from experience

It is characteristic of an empiricist to eschew metaphysics, on the ground that every factual proposition must refer to sense experience.

- Problem: how to account for **necessary truths**, including notably truths of mathematics and logic since it's always possible in principle to falsify empirical generalizations.
- Ayer needs an account that will get rid of bad metaphysics without throwing out good mathematics.

Logical Positivism

Positivism in Psychology Charles W. Tolman, 2012-12-06 Positivism needs further scrutiny In recent years there has been little consensus about the nature of positivism or about the precise forms its influence has taken on psychological theory One symptom of this lack of clarity has been that ostensibly anti positivist psychological theorizing is frequently found reproducing one or more distinctively positivist assumptions The contributors to this volume believe that while virtually every theoretically engaged psychologist today openly rejects positivism in both its 19th century and 20th century forms it is indispensable to look at positivism from all sides and to appraise its role and importance in order to make possible the further development of psychological theory

Reason and Justice Richard Dien Winfield, 1988-01-01 This is a finely argued detailed and comprehensive systematic theory of justice brilliantly extending Hegelian ethics much as Rawls's Theory of Justice rehabilitated and extended classical Liberalism Winfield argues that justice like reason must be self grounding and that to achieve this it must be self determined The theory of justice must therefore abandon its appeal to metaphysically given or transcendently constituted norms and instead determine the institutions of freedom In pursuit of this task Winfield offers insightful discussions of property relations morality the family capital and commodity relations economic and social justice and the state In contrast to Liberalism which sees the state as instrumental to non political ends Winfield defends the democratic state as the just realization of freedom Throughout it is argued that justice is defined interactively where one's freedom is determined by how one's interactions respect and foster the institutional freedom of others Although the author's arguments proceed systematically at each stage he deals adroitly with the relevant major thinkers in the Western tradition not only with Hegel but with the ancients the classical liberals Marx and contemporaries
