*Vicarious Identity in International Relations* Christopher S. Browning, Pertti Joenniemi, Brent J. Steele, 2021-01-19 Vicarious identification or living through another is a familiar social psychological concept Shaped by insecurity and a lack of self fulfilment it refers to the processes by which actors gain a sense of self identity purpose and self esteem through appropriating the achievements and experiences of others As this book argues it is also an under appreciated and increasingly relevant strategy of international relations According to this theory states identify and establish special relationships with other nations often in an aspirational way in order to strengthen their sense of self security and status on the global stage This identification is also central to the politics of citizenship and can be

manipulated by states to justify their global ambitions For example why might the United States look at Israel as a model for its own foreign policies What shaped the politics of Brexit and why is the United Kingdom so attached to its transatlantic special relationship with the United States And why did Denmark so enthusiastically ally with the United States during the global War on Terror Vicarious identity as the authors argue is at the core of these international dynamics Vicarious Identity in International Relations examines the ways in which vicarious identity is relevant to global politics across individuals between citizens and states and across states regional communities or civilizations It looks at a range of cases the United States the United Kingdom and Denmark which illustrate that vicarious political identity is dynamic and emerges in different contexts but particularly when nations face crisis both internally and externally In addition the book outlines a qualitative methodology for analyzing vicarious identity at the collective level

**Identity Change and Foreign Policy** Linus Hagstrom,2015-10-05 Identity has become an explicit focus of International Relations theory in the past two to three decades with one case attracting and puzzling many early identity scholars Japan These constructivist scholars typically ascribed Japan a pacifist or antimilitarist identity an identity which they believed was constructed through the adherence to peaceful norms and antimilitarist culture Due to the alleged resilience of such adherences little change in Japan s identity and its international relations was predicted However in recent years Japan s foreign and security policies have begun to change in spite of these seemingly stable norms and culture This book seeks to address these changes through a pioneering engagement with recent developments in identity theory In particular most chapters theorize identity as a product of processes of differentiation Through detailed case analysis they argue that Japan s identity is produced and reproduced but also transformed through the drawing of boundaries between self and other In particular they stress the role of emotions and identity entrepreneurs as catalysts for identity change With the current balance between resilience and change contributors emphasize that more drastic foreign and security policy transformations might loom just beyond the horizon This book was originally published as a special issue of The Pacific Review

Nationalism and Political Identity Sandra Joireman,2003-01-01 This is a lively and well written textbook which will prove a valuable addition to the IR textbook series mainly because the ideas it covers have changed so fundamentally in the last ten years Nationalism and ethnicity are uniquely considered within the context of both traditional IR theory and new IR ie Cold War perspectives Joireman explains the conflict between primordialism the view that ethnicity is inborn and ethnic division natural instrumentalism ethnicity is a tool to gain some larger typically material end and social constructivism the emerging consensus that ethnicity is flexible and people can make choices about how they define themselves Case studies are included on Quebec Bosnia Northern Ireland and Eritrea

**Alternative Accountabilities in Global Politics** Brent J.

Steele,2013-02-15 In fields such as politics international relations public administration and international law there is a rapidly growing interest in the topic of accountability In this innovative new work Steele shows how we might recognize how an alternative form of accountability in global politics has been present for some time and that furthermore this form s continued presence remains one of the most politically powerful if not endurable possibilities for resistance in the near future This book argues that the physical and visually shocking outcomes of violence found on the bodies of humans as well as the buildings and landscapes which surround us specifically the scars they leave behind remain one of our most compelling forms of accountability Steele develops the theoretical argument on scars and exteriority utilizing insights from several philosophical and theoretical resources including Hannah Arendt Erving Goffmann and Richard Rorty The work examines scars and their effects through several illustrations including the accounts of Emmett Till Iranian protestor Neda Agha Soltan the Syrian boy Hamza al Khateeb the massacre in WWII and then memorializing throughout the 20th century of the Lidice children in the modern day Czech Republic the particular architecturally destructive outcomes of the 2008 9 Gaza War the loss of the Twin Towers in New York as well as a variety of violent scars found on the landscapes of Europe and Southeast

Asia Emphasizing the importance of the space and time of scars the book illustrates how an alternative form of accountability in the scar can be a useful disruptive spontaneous but also creative practice to challenge the discourses of violence which remain with us today
