Ideologies Of Globalization:

Ideologies of Globalization Mark Rupert, 2000 This work examines the key debates about globalization and provides an analysis of the varied and often contradictory opposition to globalization within the United States **Globalism** Manfred B. Steger, 2002 Globalism The New Market Ideology rejects the notion that we find ourselves at the end of ideology and that democracy has won Instead Steger argues that the opening decade of the 21st century will constitute a teeming battlefield of clashing ideologies The chief protagonist is the dominant neoliberal market ideology Steger calls globalism After identifying and evaluating the five central claims of globalism including assertions that globalization is inevitable nobody is in charge of globalization and globalization benefits everyone Steger offers an overview of the counterclaims made by anti globalist forces Visit our website for sample chapters **Ideology in a Global Age** R. Soborski, 2013-06-11 This book challenges the popular view that established ideologies no longer make sense in today's globalizing world Considered from a broad historical perspective major ideological traditions have not become destabilized and incoherent by globalization but remain meaningful political beliefs that shape the globalization debate *Rethinking Globalism* Manfred B. Steger, 2004 What is the hottest American export since 9 11 The contributors to this provocative volume contend that it is Western style globalism the dominant free market ideology that determines everything from most favored nation status to the declaration of war In this much needed post September 11 analysis an interdisciplinary team of authors shows how central concepts like globalization liberty free markets and free trade are increasingly being subordinated to and lumped together with the war on terrorism led by the U S and its allies The authors here hailing from all five continents contend that globalism is being adapted to particular social and political contexts in various parts of the world Nonetheless the impact of globalization with an ideological twist can be devastating as military operations and propaganda supplant transnational trade initiatives as the focal point of global exchange And ironically the post 9 11 framework contains a major ideological contradiction Social forces otherwise profiting from expanded global mobility and interchange must come to grips with necessary limitations on certain aspects of globalization This volume was handcrafted to outline the major lines of inquiry proposed for the new Globalization series edited by Manfred B Steger and Terrell Carver Writing in accessible engaging prose the contributors to this anchor volume consider themselves critical globalization theorists who seek to provide readers with a better understanding of how dominant beliefs about globalization fashion their realities and how these ideas can be changed to bring about more equitable social arrangements Books in the series will share the same perspective and goals Globalisation, Ideology and Education Reforms Joseph Zajda, 2020-06-17 This book analyses the nexus between ideology the state and education reforms worldwide The research evinces the neo liberal ideological imperatives of current education and policy reforms and illustrates the way these shifts in the relationship between the state and education policy are affecting current trends in education reforms and schooling around the globe With this as its focus the chapters represent hand picked scholarly

research on major discourses in the field of global education reforms Offering a compendium of the very latest thought on the subject this book is like the others in the series a state of the art sourcebook for researchers practitioners and policymakers alike Not only do the chapters offer a timely analysis of current issues shaping education policy research the work also contains ideas about future directions that education and policy reforms could take By doing so it provides a comprehensive view of the diverse and intersecting discourses on globalisation and policy driven reforms in education The book draws on recent studies in the areas of globalisation education reforms and the role of the state Respective chapters critically assess the dominant discourses and debates on education and policy reforms Using diverse comparative education paradigms ranging from critical theory to historical comparative research they focus on globalisation ideology and democracy and examine both the reasons for and outcomes of education reforms and policy change

Globalization and Urban Development Harry W. Richardson, Chang-Hee C. Bae, 2006-03-30 Most research on globalization has focused on macroeconomic and economy wide consequences This book explores an under researched area the impacts of globalization on cities and national urban hierarchies especially but not solely in developing countries Most of the globalization urban research has concentrated on the global cities e g New York London Paris Tokyo that influence what happens in the rest of the world In contrast this research looks at the cities at the receiving end of the forces of globalization The general finding is that large cities on balance benefit from globalization although in some cases at the expense of widening spatial inequities

Discourses of Globalisation, Ideology, and Human Rights Joseph Zajda, Yvonne Vissing, 2022-03-11 This book examines dominant discourses in human rights education globally Using diverse paradigms ranging from critical theory to discourse analysis the book examines major human rights education reforms and policy issues in a global culture with a focus on the ambivalent and problematic relationship between human rights education discourses ideology and the state The book discusses democracy ideology and human rights which are among the most critical and significant factors defining and contextualising the processes surrounding human rights education globally The book critiques current human rights education practices and policy reforms illustrating the shifts in the relationship between the state ideology and human rights education policy Written by authors from diverse backgrounds and regions the book examines current developments in research concerning human rights education The book enables readers to gain a more holistic understanding of the nexus between human rights education and dominant ideologies both locally and globally It also provides an easily accessible practical yet scholarly insights into international concerns in the field of human rights education in the context of global culture

Globalization and Ideology Manfred B. Steger, 2025-02-06 This text provides the reader with a transdisciplinary global studies perspective of the political significance of globalization as articulated in today's three main globalisms market globalism justice globalism and religious globalism *Globalization and Ideology A Global Studies Perspective* brings together subjective and objective aspects of globalization that are usually treated separately from each other Focusing on the

transformation of the contemporary ideological landscape the book is divided into three parts containing an original preface and nine chapters Collectively the chapters respond to a broad range of questions including How are political ideologies and social imaginaries being transformed in the global age What sorts of ideological claims are being generated by the three main globalisms How do these political ideas play out in concrete social political and cultural contexts How do globalisms shape urban spaces and popular images and how in turn are they shaped by global ideologies How are traditional academic disciplines like political theory responding to global flows of ideas and theories that cut across conventional scholarly boundaries What does the fledgling field of global studies contribute to new forms of knowledge on these subjects What is the relationship between globalizing ideologies and post 9 11 American Empire Why has there been a surge of religious globalisms such as jihadist Islamism Christian global fundamentalism Falun Gong syncretism and Buddhism Is the World Social Forum an effective site of ideological counter production capable of generating appealing political visions of another world opposed to market globalisms Has the lingering Great Recession halted the worldwide ascent of neoliberalism or will it regain its former glory Rather than reaching the end of ideology are we entering a new era of global ideological struggle

Globalisms Manfred B. Steger, 2008-12-16 This new edition of Manfred Steger's award winning book explores the three principal ideologies of our time the dominant market globalism based on a neoliberal vision of the world as a single marketplace the justice globalism developed over the last decade by a transnational coalition of global civil society forces and the jihadist globalism of radical Islamists seeking to galvanize their global community of believers into violent action Market globalism has responded to these challengers by turning into imperial globalism a political belief system that marries the capitalist language of the 1990s with the security concerns of our post 9 11 world Steger one of the world's leading scholars on these subjects explores globalization's central questions What exactly are the core claims of these conflicting globalisms How does the imperial globalism of the 2000s differ from the market globalism of the 1990s How has justice globalism managed to mature into a coherent ideology What are the most likely future trajectories of this great ideological struggle of the twenty first century Written with impressive historical and theoretical breadth this groundbreaking work is essential reading for all those concerned with the key questions that our shrinking world must face **Ideology, Globalization and**

Social Movements Elaine Suzanne Coburn, 2002 *The Rise of the Global Imaginary* Manfred B. Steger, 2008-07-03 Neoliberalism Neoconservatism Postmarxism Postmodernism Is there really something genuinely new about today's isms Have we moved past our traditional ideological landscape Combining political history philosophical interpretation and good old fashioned story telling Manfred Steger traces ideology's remarkable journey from Count Destutt de Tracy's Enlightenment science of ideas to President George W Bush's imperial globalism Rejecting futile attempts to update modern political belief systems by adorning them with prefixes the author offers instead a highly original explanation for their novelty their increasing ability to articulate deep seated understandings of community in global rather than national terms This

growing awareness of globality fuels the visions of social elites who reside in the privileged spaces of our global cities It erupts in the hopes and demands of migrants who traverse national boundaries in search of their piece of the global promise Stoked by cross cultural encounters technological change and scientific innovation the rising global imaginary has destabilized the grand political ideologies codified during the national age The national is slowly losing its grip on people s minds but the global has not yet ascended to the commanding heights once occupied by its predecessor Still the first rays of the rising global imaginary have provided enough light to capture the contours of a profoundly altered ideological landscape Pointing in this direction the book ends with a timely interpretation of the apparent convergence of ideology and religion in the dawning global age a broad phenomenon that extends beyond the obvious cases of Christian fundamentalism and Islamic jihadism
