The Politics of Equity Finance in Emerging Markets Department of Political Science Case Western Reserve University

Kathryn C. Lavelle Professor, 2004-09-24 Emerging market stock issuance relative to GDP rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the connection between owning shares of emerging market stock and the ability to influence the management of these firms remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have had the objective of providing for some degree of local ownership and control of large economic entities since the late nineteenth century However local markets have operated under different global political structures since that time ranging from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging equity markets She departs from conventional economic explanations and examines politics at the micro level of large issues of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy

Intellectual Property and the New Global Japanese Economy Ruth Taplin, 2009-04-02 This book examines how intellectual property IP is used in Japan and

Japanese Phoenix: The Long Road to Economic Revival Richard Katz, 2020-07-24 Japan will recover and its economic achievements will once again earn the world's admiration with sustained annual growth of three percent perhaps more well within reach This is the confident forecast that begins *Japanese Phoenix: The Long Road to Economic Revival* by the author of *Japan The System That Soured* which several years ago accurately predicted Japan's current travails at a time when others were prematurely pronouncing full recovery Katz warns however that there is bad news to go with the good So deep seated are Japan's dysfunctions that even if it did everything right today it would take at least five years for truly vibrant growth to take hold But Japan will not do everything right Opposition to reform is deep seated and a myriad of vested interests and millions of jobs are at stake Still he notes there is little doubt that reform will succeed *Japanese Phoenix* tells the story of the struggle between the forces of reform and the forces of resistance It dissects Prime Minister Koizumi's role in the process and explains why Japan is in so much trouble and what needs to be done It explores the debates among economists and gives a careful progress report on all the moves made so far in the name of reform from greater direct foreign investment to the financial Big Bang to ending one party rule by the Liberal Democratic Party Katz concludes that this is just the second round of a 15 round fight Japan is a great nation currently trapped in obsolete institutions As it has before Japan will find a way to surmount its problems and regain its forward progress
