Ideology and the Rationality of Domination Gerhard Wolf, 2020-06-09 This well-researched clear and convincing historical study examines the ideology and politics of Germanization during the WWII occupation of Poland Nicholas Stargardt author of *The German War* Following the brutal invasion and occupation of Poland the Nazis moved swiftly to realize one of their key ideological aims the expansion of German living space This involved deporting Jews bringing in German settlers and establishing an evaluation process that separated Poles from ethnic Germans As simple as this might have seemed initially the various parts of the German occupation machinery were soon embroiled in a bitter fight about the essence of Germanness and how to identify a German In this illuminating study Gerhard Wolf reveals an astonishing development in which a more inclusive understanding of Germanness based on the notion of Volk won out against an exclusive definition based on Rasse As Wolf demonstrates this decision paved the way for turning three million Poles into German citizens Parallel to the mass deportation and murder of Christian Poles and the genocide of Jewish Poles the Nazis paradoxically also presided over the largest forced assimilation program in German history Students and scholars of the Second World War the Holocaust and Nazism will find new analysis of German imperialism ethnic cleansing and genocide in this important book

Sociology, Ideology and Utopia Chattopadhyaya, 2021-11-01 This engaging wide ranging study in comparative social and political philosophy gives a well argued account of how ideological and even utopian views such as normative communication development and justice are sociologically rooted It also shows how this fact has been reflected in the social history of Asian countries like India and China as well as some Western countries during the last two centuries To illustrate the underlying concepts reference is made to influential thinkers both from the East and West from Hegel and James Mill to Marx and Maozedong and from Gandhi to Rawls The author himself one of the major contemporary Indian philosophers offers arguments to show that the right version of cultural relativism is objective and judgeable Concrete case studies are cited indicating why even fundamental values like indivisible peace and our own green planet cannot be practically universalized Yet this work is a sustained plea for improvable understanding between the East and the West and the transcultural value orientation of different cultures

The Fruits of Fascism Simon Reich, 2018-08-06 The West German economic miracle Simon Reich suggests may be best understood as a result of the discriminatory economic policies of the Nazi regime Reich contends that ideological and institutional characteristics originating under fascism were sustained despite Germany s return to democracy

and heavily influenced the economic success of its automobile industry. By contrast the liberal economic policies of the British state led in time to the decline of an industrial sector that in 1930 had closely resembled its German counterpart. Through detailed comparative histories of German and British automobile firms Reich challenges traditional explanations of the divergent performances of the two nations' economies and sheds new light on the relationship between state policy and economic success in pre and postwar Europe. Liberal nondiscriminatory British policies favorable to multinational investment contributed significantly to the decline of domestic firms he argues so that eventually multinationals could threaten the health of the entire British economy by investing elsewhere. The Nazi state however thwarted the development of American subsidiaries and fostered a core of producers government officials bankers and labor union leaders.

The Crisis of Marxist Ideology in Eastern Europe Vladimir Tismaneanu, 2023-03-31 First published in 1988 *The Crisis of Marxist Ideology in Eastern Europe* states that since de Stalinisation began in Eastern Europe the dead hand of institutional Marxism has been eroded by

revisionist Marxism with the turn to young Marx and the philosophy of human emancipation to undermine prevailing orthodoxies But this revisionism clung to the old socialist dogmas and refused a total break with the system and the effort eventually failed The result was the emergence of a dissident counterculture rejecting the system entirely Independent social movements such as unofficial peace groups and trade unions like Solidarity have given this counterculture a major role in Eastern Europe whilst the ruling elites have responded with confusion Tismaneanu concludes that the only hope for the anti totalitarian intellectuals of Eastern Europe is to oppose the regimes with non Marxist ideas otherwise they will be permanently reduced to the status of a hopeless albeit heroic minority This book will be of interest to students of economics political science and international relations

Marx's Construction of Social Theory J. Barbalet, 2015-04-17 This study first published in 1983 explores the connections between Marx's philosophy and his empirical analysis of society and state by showing the different meanings of many of Marx's concepts as their role in his theory changes and the theory itself develops Beginning with an examination of Marx's search for a sound epistemological basis on which to build a social theory Dr Barbalet then gives an analysis of the way in which Marx continually modifies the concepts he uses and continues with an examination of the different functions they are given in different theoretical settings Various nuances of Marx's thought often obscured by the simplistic early/late dichotomy are revealed by Dr Barbalet's close attention to the progressive transformation of Marx's concepts and by his scrupulous analysis of them in not only their textual but also their theoretical context Finally the book examines the manner in which Marx's construction of social theory by its very nature means that some material is replaced by other theoretical fabric as the theoretical structure itself is in different ways dismantled and reorganised as Marx's thought evolves and develops
