domestic coziness and familial kindness Yet for all their supposed significance the animals in nineteenth century fiction were never granted the same fullness of character or consciousness as their human masters they remain secondary figures Minor Creatures re examines a slew of literary classics to show how Victorian notions of domesticity sympathy and individuality were shaped in response to the burgeoning pet class The presence of beloved animals in the home led to a number of welfare minded political movements inspired in part by the Darwinian thought that began to sprout at the time Nineteenth century animals may not have been the heroes of their own lives but as Kreilkamp shows the history of domestic pets deeply influenced the history of the English novel **The Eclectic Magazine** John Holmes Agnew, Walter Hilliard Bidwell, 1844
