Reinventing Jerusalem Simone Ricca, 2007-05-25 The Jewish quarter of Jerusalem today seems like an organic fusion of a modern Israeli city with an ancient Jewish heritage However as Simone Ricca details in this fascinating book the aesthetics of the Jewish Quarter were deliberately planned and executed by Israel after it was occupied during the 1967 war Secular nationalist as well as religious politicians agreed that it should be turned in to the capital of the Jewish nation and that it should be excavated and developed in such a way as to create a sense of continuity with the Jewish people's historical claims to the land Zionist ideology was thus translated in to bricks and mortar as modern civic amenities were constructed around historic sites such as the Wailing Wall and the Hurva Synagogue Ricca examines the politics of heritage conservation and shows that the Old City's reconstruction did not so much preserve the past as inscribe an identity on to the future **Index**

Compositions in Architecture Don Hanlon, 2009-03-23 Architecture Use the patterns of architectural composition to inspire creative design In *Compositions in Architecture* Don Hanlon offers students an excitingly original path to discovering architectural composition one that avoids the traditional either/or choice between theory and practice By exploring the

underlying patterns of organization in architecture this book enables the reader to connect architectural theory with the design process And by relating what happens in the design studio with how the architect thinks about architectural composition the approach spurs creative thinking With examples that range across diverse cultures and historical periods from the famous to the obscure the author reveals the universal compositional strategies that can be used to solve particular architectural problems Readers will explore The five formal properties of composition number geometry proportion hierarchy and orientation How the plan conveys the central organizing strategy of a building Typological similarities of architectural forms that cut across cultural social historical and geographic boundaries Enriched by a graphic approach that will appeal to visual learners Compositions in Architecture reveals the formal structures in architecture throughout the world as well as through the ages and inspires architects to turn abstract ideas into real world design *Urban Informality* Ananya Roy,Nezar AlSayyad,2004-01-01 The turn of the century has been a moment of rapid urbanization Much of this urban growth is taking place in the cities of the developing world and much of it in informal settlements This book presents cutting edge research from various world regions to demonstrate these trends The contributions reveal that informal housing is no longer the domain of the urban poor rather it is a significant zone of transactions for the middle class and even transnational elites Indeed the book presents a rich view of urban informality as a system of regulations and norms that governs the use of space and makes possible new forms of social and political power The book is organized as a transnational endeavor It brings together three regional domains of research the Middle East Latin America and South Asia that are rarely in conversation with one another It also unsettles the hierarchy of development and underdevelopment by looking at some First World processes of informality through a Third World research lens *New Islamic Urbanism* Stefan Maneval ,2019-12-04 Since the dawn of the oil era cities in Saudi Arabia have witnessed rapid growth and profound societal changes As a response to foreign architectural solutions and the increasing popularity of Western lifestyles a distinct style of architecture and urban planning has emerged Characterised by an emphasis on privacy expressed through high enclosures gates blinds and tinted windows New Islamic Urbanism constitutes for some an important element of piety For others it enables alternative ways of life indulgence in banned social practices and the formation of both publics and counterpublics Tracing the emergence of New Islamic Urbanism this book sheds light on the changing conceptions of public and private space in the twentieth and early twenty first centuries in the Saudi city of Jeddah It challenges the widespread assumption that the public sphere is exclusively male in Muslim contexts such as Saudi Arabia where women s public visibility is limited by the veil and strict rules of gender segregation Showing that the rigid segregation regime for which the country is known serves to constrain the movements of men and women alike Stefan Maneval provides a nuanced account of the negotiation of public and private spaces in Saudi Arabia Contemporary Architecture in the Arab States Udo Kultermann,1999 Coupling case studies with over 100 never before seen illustrations this volume chronicles modern architectural developments in the nations of Egypt
