Legless In Flight:

Legless in Flight Laurel Trivelpiece, 1978 **Army Ants** Daniel J. C. Kronauer, 2020-10-06 A richly illustrated captivating study of army ants nature's preeminent social hunters A swarm raid is one of nature's great spectacles In tropical rainforests around the world army ants march in groups by the thousands to overwhelm large solitary invertebrates along with nests of termites wasps and other ants They kill and dismember their prey and carry it back to their nest where their hungry brood devours it They are the ultimate social hunters demonstrating the most fascinating collective behavior In *Army Ants* we see how these insects play a crucial role in promoting and sustaining the biodiversity of tropical ecosystems The ants help keep prey communities in check while also providing nutrition for other animals Many species depend on army ants for survival including a multitude of social parasites swarm following birds and flies And while their hunting behavior and the rules that govern it are clearly impressive army ants display collective behavior in other ways that are no less dazzling They build living nests called bivouacs using their bodies to protect the queen and larvae The ants can even construct bridges over open space or obstacles by linking to one another using their feet These incredible feats happen without central coordination They are the result of local interactions self organization that benefits the society at large Through observations stories and stunning images Daniel Kronauer brings these fascinating creatures to life Army ants may be small but their collective intelligence and impact on their environment are anything but **The Last of NASA's Original Pilot Astronauts** David J. Shayler, Colin Burgess, 2017-06-19 Resulting from the authors deep research into these two pre Shuttle astronaut groups many intriguing and untold stories behind the selection process are revealed in the book The often extraordinary backgrounds and personal ambitions of these skilled pilots chosen to continue NASA's exploration and knowledge of the space frontier are also examined In April 1966 NASA selected 19 pilot astronauts whose training was specifically targeted to the Apollo lunar landing missions and the Earth orbiting Skylab space station Three years later following the sudden cancellation of the USAF's highly classified Manned Orbiting Laboratory MOL project seven military astronauts were also co-opted into NASA's space program This book represents the final chapter by the authors in the story of American astronaut selections prior to the era of the Space Shuttle Through personal interviews and original NASA documentation readers will also gain a true insight into a remarkable age of space travel as it unfolded in the late 1960s and the men who flew those historic missions **Information Bulletin** Soviet Union. Posol'stvo (U.S.), 1948 **Captains of the Sands** Jorge Amado, 2013-06-25 A Brazilian *Lord of the Flies* about a group of boys who live by their wits and daring in the slums of Bahia A Penguin Classics They call themselves Captains of the Sands a gang of orphans and runaways who live by their wits and daring in the torrid slums and sleazy back alleys of Bahia Led by fifteen year old Bullet the band including a crafty liar named Legless the intellectual Professor and the sexually precocious Cat pulls off heists and escapades against the right and privileged of Brazil But when a public outcry demands the capture of the little criminals the fate of these children becomes a

poignant intensely moving drama of love and freedom in a shackled land Captains of the Sands captures the rich culture vivid emotions and wild landscape of Bahia with penetrating authenticity and brilliantly displays the genius of Brazil s most acclaimed author For more than seventy years Penguin has been the leading publisher of classic literature in the English speaking world With more than 1 700 titles Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors as well as up to date translations by award winning translators

Neural Mechanisms of Startle Behavior Robert C. Eaton,2013-11-11 In the past fifteen years there has been considerable interest in neural circuits that initiate behavior patterns For many types of behaviors this involves decision making circuits whose primary elements are neither purely sensory nor motor but represent a higher order of neural processing Of the large number of studies on such systems analyses of startle circuits compose a major portion and have been carried out on systems found throughout the animal kingdom Startle has been an important model because of the reliability of the behavioral act for laboratory study and the accessibility of the underlying neural circuitry However probably because of the breadth of the subject this material has never been reviewed in a comprehensive way that presents the elements common to startle circuits in the different animal systems in which they occur This book presents a diversity of approaches based on a broad background of animal groups ranging from the earliest nervous systems in cnidarians to the most recently evolved and advanced in mammals The behaviors themselves are all short latency fast motor acts when considered on the time scale of the organism and involve avoidance or evasion although in some cases we do not yet completely understand their natural role These behaviors occur in response to stimuli that have sudden or unexpected onset

Shattered Dreams Colin Burgess, 2019-05-01 Shattered Dreams delves into the personal stories and recollections of several men and women who were in line to fly a specific or future space mission but lost that opportunity due to personal reasons mission cancellations or even tragedies While some of the subjects are familiar names in spaceflight history the accounts of others are told here for the first time Colin Burgess features spaceflight candidates from the United States Russia Indonesia Australia and Great Britain Shattered Dreams brings to new life such episodes and upheavals in spaceflight history as the saga of the three Apollo missions that were cancelled due to budgetary constraints and never flew NASA astronaut Patricia Hilliard Robertson who died of burn injuries after her airplane crashed before she had a chance to fly into space and a female cosmonaut who might have become the first journalist to fly in space Another NASA astronaut was preparing to fly an Apollo mission before he was diagnosed with a disqualifying illness There is also the amazing story of the pilot who could have bailed out of his damaged aircraft but held off while heroically avoiding a populated area and later

applied to NASA to fulfill his cherished dream of becoming an astronaut despite having lost both legs in the accident. These are the incredibly human stories of competitive realists fired with an unquenchable passion. Their accounts reveal in their own words and those of others close to them how their shared ambition would go awry through personal accidents, illness, the Challenger disaster, death, or other circumstances.
