## **Enabling Environments Measuring The Impact Of Environment On Disability And Rehabilitation:**

**Enabling Environments** Edward Steinfeld,G. Scott Danford,1999-04-30 This collection focuses on methods for measuring the role of the physical environment in the disablement process and the limitations of current theory knowledge and research in the field Linking the chapters is a new paradigm of research on accessibility which emphasizes that disability is both a social and an individual process and is consistent with recent developments in a disability rights rehabilitation practice and environmental design

*Enabling Environments* Edward Steinfeld,G. Scott Danford,2013-06-29 This volume is the first effort to compile representative work in the emerging research area on the relationship of disability and physical environment since Barrier Free Environments edited by Michael Bednar was published in 1977 Since that time disability rights legislation like the Americans with Disabilities Act in the United States the worldwide growth of the independent living movement rapid deinstitutionalization and the maturation of functional assessment methodology have all had their impact on this research area The impact has been most noticeable in two ways fostering the integration of environmental variables in rehabilitation research and practice and changing paradigms for environmental interventions As the contributions in this volume demonstrate the relationship of disability and physical environment is no longer of interest primarily to designers and other professionals concerned with managing the resources of the built environment The physical environment has always been recognized as an important variable affecting rehabilitation outcome Until recently however concepts and tools were not available to measure its impact in clinical practice and outcomes research In particular lack of a theoretical foundation that integrated environment with the disablement process hampered development of both research and clinical methodology Thus the physical environment received little attention from the mainstream rehabilitation research community However this situation is changing rapidly

**Assistive Technology - Shaping the Future** Ger M. Craddock,2003 This publication covers different themes in the field of assistive technology The theme New technologies will explore the significant advances in technology research development and how these can be harnessed to benefit people with disabilities This will include evolving technologies affording interesting insights into the future The theme User Centred Approach will look at fundamental ways in which the EU advocate a philosophy of citizenship and governance and how this philosophy can be advanced to ensure that people with disabilities become central to the assistive technology process Another issue that is explored in this publication is Interdisciplinary Approaches which can be developed within assistive technology and the provision of services to people with disabilities Finally it concentrates on ways in which practitioners and users working together within assistive technology can achieve best practice in the development and implementation of Guidelines and Standards across a broad spectrum
