Araszkiewicz, Krzysztof Pleszka, 2015-10-05 This book presents the current state of the art regarding the application of logical tools to the problems of theory and practice of lawmaking It shows how contemporary logic may be useful in the analysis of legislation legislative drafting and legal reasoning concerning different contexts of law making Elaborations of the process of law making have variously emphasised its political social or economic aspects Yet despite strong interest in logical analyses of law questions remains about the role of logical tools in law making This volume attempts to bridge that gap or at least to narrow it drawing together some important research problems and some possible solutions as seen through the work of leading contemporary academics The volume encompasses 20 chapters written by authors from 16 countries and it presents diversified views on the understanding of logic from strict mathematical approaches to the informal argumentative ones and differentiated choices concerning the aspects of law making taken into account The book presents a broad set of perspectives insights and results into the emerging field of research devoted to the logical analysis of the area of creation of law How does logic inform lawmaking Are legal systems consistent and complete How can legal rules be represented by means of formal calculi and visualization techniques Does the structure of statutes or of legal systems resemble the structure of deductive systems What are the logical relations between the basic concepts of jurisprudence that constitute the system of law How are theories of legal interpretation relevant to the process of legislation How might the statutory text be analysed by means of contemporary computer programs These and other questions ranging from the theoretical to the immediately practical are addressed in this definitive collection *Searching the Law, 3d Edition* Frank Bae, Edward Bander, Francis Doyle, Joel

Fishman, Paul Richert, 2021-12-13 **Drafting Federal Grant Statutes** Administrative Conference of the United States.

Office of the Chairman, 1990 **Civil Procedure in a Nutshell** Mary Kay Kane, 1985 *Failures of American Methods of Lawmaking in Historical and Comparative Perspectives* James R. Maxeiner, 2018-03-08 In this book James R Maxeiner takes on the challenge of demonstrating that historically American law makers did consider a statutory methodology as part of formulating laws In the nineteenth century when the people wanted laws they could understand lawyers inflicted judge made statute destroying common law on them Maxeiner offers the cure for common law in the form of sensible statute law Building

on this historical evidence Maxeiner shows how rule making in civil law jurisdictions in other countries makes for a far more equitable legal system. Sensible statute laws fit together; one statute governs as opposed to several laws that even lawyers have trouble disentangling. In a statute law system lawmakers make laws for the common good in sensible procedures and judges apply sensible laws and do not make them. This book shows how such a system works in Germany and would be a solution for the American legal system as well.

Health Care Law-making in Central and Eastern Europe André den Exter, 2002 This book examines the relevance of a theoretical model of health care lawmaking in several Central Eastern European countries Confronted with the legacy of the ancient regime the countries selected shifted away from a socialist model towards a more market oriented health care system From a legal perspective this change of system imposed on government the need for drastic reforms starting with the introduction of a compulsory health insurance scheme based on the notion of solidarity Future accession to the EU requiring the incorporation of the *acquis communautaire* has increased the complexity of legal reforms since Strengthening the reform process the author developed a method of law making based on legal theoretical understanding Case study research in three selected countries justifies the conclusion that the analytical model rationalises the law making activity including the EU law approximation process What is more it became apparent that the importance of this theoretical model is not restricted only to the selected countries but may also be a valuable instrument for other countries in transition in the region Health care law making in Central and Eastern Europe Review of a legal theoretical model provides a unique resource for scholars and policy makers interested in legal reforms in Central Eastern European health care systems The Code of civil procedure and all remedial law, the Probate code, the Penal code and the criminal procedure, the constitutions and organic acts Minnesota, 1893
