Florinda Matos,2022-11-10 **Legitimation Crisis** Juergen Habermas,1975-08-25 Critical Theory originated in the perception by a group of German Marxists after the First World War that the Marxist analysis of capitalism had become deficient both empirically and with regard to its consequences for emancipation and much of their work has attempted to deepen and extend it in new circumstances Yet much of this revision has been in the form of piecemeal modification In his latest work Habermas has returned to the study of capitalism incorporating the distinctive modifications of the Frankfurt School into the foundations of the critique of capitalism Drawing on both systems theory and phenomenological sociology as well as Marxism the author distinguishes four levels of capitalist crisis economic rationality legitimation and motivational crises In his analysis all the Frankfurt focus on cultural personality and authority structures finds its place but in a systematic framework At the same time in his sketch of communicative ethics as the highest stage in the internal logic of the evolution of ethical systems the author hints at the source of a new political practice that incorporates the imperatives of evolutionary rationality **Legitimacy and the European Union** Thomas Banchoff,Mitchell Smith,2005-08-12 Since the Maastricht ratification debate of the early 1990s the legitimacy of the European Union has become a subject of controversy With unprecedented force Europeans have begun to question the need for deeper integration Some fear threats to established national identities while others perceive the emergence of a distant but powerful Brussels beyond the reach of democratic control Legitimacy and the European Union breaks with established approaches to the problem of the legitimacy of the European Union by focusing on the recent trend towards reconceptualization of the EU not as a superstate or an organization of states but as a multi level contested polity without precedent The book examines the implications of this reconceptualization for the problem of legitimacy Individual chapters focus on policy areas institutions and identity politics Taken together they reach two main conclusions While Europeans do not strongly identify with the EU they increasingly recognize it as a framework for politics alongside existing national and subnational structures And while the EU lacks central democratic institutions the integration process has spawned significant informal and pluralist forms of representation Rethinking recognition and representation outside the context of the nation state points to important if little understood actual and potential sources of EU legitimacy **Local Partnerships for Rural Development** Malcolm J. Moseley,2003 This book has been developed from a report of the cross national PRIDE Partnerships for Rural Integrated Development in Europe research project The research involved focusing on public and private sector rural development experience of six member states of the European Union namely Finland Germany Italy Spain Sweden and the UK **The Routledge Handbook for Advancing Integration in Mixed Methods Research** John H. Hitchcock,Anthony J. Onwuegbuzie,2022-05-10 This groundbreaking edited book The Routledge Handbook for Advancing Integration in Mixed Methods Research presents an array of different integration ideas with contributions from scholars across the globe This handbook represents the first major volume that comprehensively discusses this topic of integration Perhaps the most

fundamental and longstanding question in mixed methods research is How does one best integrate disparate forms of information to produce the best form of inquiry Each of the 34 seminal chapters in this handbook accelerates the discussion of integration across a broad range of disciplines including education arts based analyses and work in the Global South as well as special topics such as psychometrics and media research Many of the chapters present new topics that have never been written about before and all chapters offer cutting edge approaches to integration They also offer different perspectives of integration leading the introductory chapter to offer a new and comprehensive definition for integration as follows referring to the optimal mixing combining blending amalgamating incorporating joining linking merging consolidating or unifying of research approaches methodologies philosophies methods techniques concepts language modes disciplines fields and or teams within a single study The concluding chapter offers a meta framework that accounts for this definition and is designed to help scholars think more about integration in a way that represents a continuous dynamic iterative interactive synergistic and holistic meaning making process This handbook will be an essential reference work for all scholars and practitioners using or seeking to use mixed methods in their research

The Sustainable Development Paradox Rob Krueger,David

Gibbs,2007-08-30 Sustainability with its promise of economic prosperity social equity and environmental integrity is hardly a controversial goal Yet scholars have generally overlooked the ways that policies aimed at promoting sustainability at local national and global scales have been shaped and constrained by capitalist social relations This thought provoking book reexamines sustainability conceptually and as it actually exists on the ground with a particular focus on Western European and North American urban contexts Topics include critical theoretical engagements with the concept of sustainability how sustainability projects map onto contemporary urban politics and social justice movements the spatial politics of conservation planning and resource use and what progressive sustainability practices in the context of neoliberalism might look like

Innovation Systems and Capabilities in Developing Regions Willie Siyanbola,Olumuyiwa Olamide,2016-05-23 In today s knowledge driven world innovation and innovation systems have become key policy issues However the extent of knowledge that is available on these concepts in less developed countries is still relatively low Much of what we know about innovation theory and systems has come from the developed countries and reflects their world view This apparent knowledge deficit has major implications for less developed countries *Innovation Systems and Capabilities in Developing Regions* adds to the growing body of knowledge on developing countries The theoretical and empirical case studies presented here advance the notion that while developing countries may not engage in frontier research a critical knowledge base upon which these countries compete for global markets is emerging There is evidence that state and non state actors are increasingly emphasising policies that sit within the framework of national innovation systems This book illuminates this shift in policy competence at national levels The contributions in this volume highlight the need for thorough understanding of the role of diffusion based innovation linked to technology transfer and acquisition They also provide empirical evidence on the drivers dynamics and impact of such innovation in developing economies and the constraints that apply Contributors also document the application of the innovation system approach in developing countries as well as the build up and diffusion of technological capabilities within innovation systems Academics higher level students policy makers and practitioners involved with innovation and the economics of technical change particularly in developing countries will find this a valuable book

Integrating Human, Social, and Sustainable Development Leon Miller,2025-01-11 The conviction that the basic intent of social activity is to realize the goal that human social action aims to achieve is fundamental to political thinking practice and philosophy This book proposes a model for realizing this goal by employing fundamental socio political principles for establishing stable relations between citizens social order solidarity cohesion harmony good will prosperity and sustainable peace In other words the major centers of civilization regard socio political philosophy as a prescription for human development i e developing the capabilities of individuals and enabling them to realize desired functionings and social development Capabilities are defined as qualities that enable individuals to convert primary social goods into the value ends that enable them to live well Developing capabilities provides substantive freedom to choose a life one has reason to value as

well as the ability to realize desired functionings as Amartya Kumar Sen puts it Functionings are the states of being that enable people to live with dignity or the substantive opportunity to achieve the things they value doing or being
