North and the South the technology gap As technological innovation based on research and development is the engine which  
drives economic growth and most developing countries are left out of research and development in high technology it is

narrowed if both environmental and international security is to be increased This book emphasises the development of  
human resources in technology co development moving from traditional to contemporary to futuristic concepts and makes a  
number of concrete recommendations which should be on the development environment agenda for the 1990 s
