as Computers in Health Care the series offers a broad range of titles some are addressed to specific professions such as nursing medicine and health administration others to special areas of practice such as trauma and radiology Still other books in this series focus on interdisciplinary issues such as the computer based patient record electronic health records and networked healthcare systems Renamed Health Informatics in 1998 to reflect the rapid evolution in the discipline now known as health informatics the series continues to add titles that contribute to the evolution of the field In this series eminent experts serving as editors or authors offer their accounts of innovation in health informatics Increasingly these accounts go beyond hardware and software to address the role of information in influencing the transformation of healthcare delivery systems around the world The series also increasingly focuses on peopleware and the organizational behavioral and societal changes that accompany the diffusion of information technology in health services environments

Teaching and Learning in Information Retrieval Efthimis Efthimiadis, Juan M. Fernández-Luna, Juan F. Huete, Andrew MacFarlane, 2011-10-06

Information Retrieval has become a very active research field in the 21st century Many from academia and industry present their innovations in the field in a wide variety of conferences and journals Companies transfer this new knowledge directly to the general public via services such as web search engines in order to improve their information seeking experience In parallel teaching IR is turning into an important aspect of IR generally not only because it is necessary to impart effective search techniques to make the most of the IR tools available but also because we must provide a good foundation for those students who will become the driving force of future IR technologies There are very few resources for teaching and learning in IR the major problem which this book is designed to solve The objective is to provide ideas and practical experience of teaching and learning IR for those whose job requires them to teach in one form or another and where delivering IR courses is a major part of their working lives In this context of providing a higher profile for teaching and learning as applied to IR the co editor of this book Efthimis Efthimiadis had maintained a leading role in teaching and learning within the domain of IR for a number of years This book represents a posthumous example of his efforts in the area as he passed away in April 2011 This book his book is dedicated to his memory

Advanced Topics in Information Retrieval Massimo Melucci, Ricardo

Baeza-Yates, 2011-06-10 Information retrieval is the science concerned with the effective and efficient retrieval of documents starting from their semantic content. It is employed to fulfill some information need from a large number of digital documents. Given the ever growing amount of documents available and the heterogeneous data structures used for storage, information retrieval has recently faced and tackled novel applications. In this book, Melucci and Baeza Yates present a wide spectrum illustration of recent research results in advanced areas related to information retrieval. Readers will find chapters on e.g. aggregated search, digital advertising, digital libraries, discovery of spam and opinions, information retrieval in context, multimedia resource discovery, quantum mechanics applied to information retrieval, scalability challenges in web search engines, and interactive information retrieval evaluation. All chapters are written by well known researchers, are completely self contained and comprehensive, and are complemented by an integrated bibliography and subject index. With this selection, the editors provide the most up to date survey of topics usually not addressed in depth in traditional text books on information retrieval. The presentation is intended for a wide audience of people interested in information retrieval: undergraduate and graduate students, post doctoral researchers, lecturers, and industrial researchers.
