Thompson, 2020-07-15 The NP is one of the least controversial grammatical units that linguists work with The NP is often assumed to be universal and appears to be robust cross linguistically compared to VP or even clause in that it can be manipulated in argument positions in constructed examples Furthermore for any given language its internal structure order and type of modifiers tends to be relatively fixed Surprisingly however the empirical basis for NP has never been established The chapters in this volume examine the NP in everyday interactions from diverse languages including little studied languages as well as better researched ones in a variety of interactional settings Together these chapters show that cross linguistically the category NP is not as robust as has been assumed in the context of temporally unfolding human interaction its structural status is constantly negotiated in terms of participants evolving social agendas

On ne naît pas femme : on le devient Bonnie Mann, Martina Ferrari, 2017-07-20 This collection of essays takes up the most famous feminist sentence ever written Simone de Beauvoir's *On ne naît pas femme on le devient* finding in it a flashpoint that galvanizes feminist thinking and action in multiple dimensions Since its publication the sentence has inspired feminist thinking and action in many different cultural and linguistic contexts Two entangled controversies emerge in the life of this sentence a controversy over the practice of translation and a controversy over the nature and status of sexual difference Various translations into English as *One is not born but rather becomes a woman* Parshley 1953 *one is not born but rather becomes woman* Borde and Malovany Chevallier 2010 and *women are made not born* in popular parlance the conflict over the translation crystallizes the feminist debate over the possibilities and limitations of social construction as a theory of sexual difference When Sheila Malovany Chevallier and Constance Borde contributors to this volume translated *Le Deuxième Sexe* into English in 2010 their decision to alter the translation of the famous sentence by omitting the *le* ignited

debate that has not yet exhausted itself The controversy over the English translation has opened a conversation about translation practices and their relation to meaning more generally and broadens in this volume into an examination of the life of Beauvoir's key sentence in other languages and political and cultural contexts as well The philosophers translators literary scholars and historian who author these essays take decidedly different positions on the meaning of the sentence in French and thus on its correct translation in a variety of languages but also on the meaning and salience of the question of sexual difference as it travels between languages cultures and political worlds

Fixed Expressions Ritva Laury, Tsuyoshi Ono, 2020-11-15 This volume concerns the structure and use of fixed expressions in a range of typologically genetically and areally distinct languages The chapters consider the use contexts of fixed expressions at the same time taking seriously the need to account for their structural aspects Formulaicity is taken here as a central feature of everyday language use and fixed expressions as a basic utterance building resource for interaction Our crosslinguistic investigation suggests that humans have the propensity to automatize ways to handle various discourse level needs for specific sequential contexts by creating semi fixed expressions based on frequent patterns The chapters examine topics such as the degrees and types of fixedness the emergence of fixed expressions their connection to social action the new understanding of traditional linguistic categories in light of fixedness crosslinguistic variation in types of fixed expressions as well as their non verbal aspects The volume situates the notion of units of language at the intersection of interaction and formal structure as part of a larger effort to replace rule based conceptions of language with a more dynamic realistic and pragmatically based model of language The articles are based on naturally occurring data mostly everyday conversation in English Estonian Finnish Japanese and Mandarin with some crosslinguistic comparison
