**Foreign-language and English Dictionaries in the Physical Sciences and Engineering** Tibor W. Marton, 1964 The bibliography lists over 2800 unilingual, bilingual and polyglot dictionaries, glossaries and encyclopedias in the physical sciences, engineering and technology published during the past twelve years. The majority of the titles cited have English as the source or target language or are dictionaries giving definitions in English. The bibliographic entries are arranged in 49 subject classes; within each subject, the entries are listed alphabetically by language and within each language group by author. Forty-seven foreign languages are represented in the compilation. Lists of abbreviations and reference sources and detailed author language and subject indexes complement the publication. Author.

*Language Learning and Leisure* Denyze Toffoli, Geoffrey Sockett, Meryl Kusyk, 2023-07-04 The study of informal involvement with additional languages has recently emerged as a dynamic research field in SLA. With the rapid development and spread of internet-based technologies, contact with foreign languages outside the classroom has become commonplace. While this can take multiple forms, online contents are a major driving force because they present learners with unprecedented opportunities for exposure to and use of target languages regardless of their physical location. Research from diverse geographical, educational and socio-economic contexts brings a rich variety of perspectives to this book. It explores these phenomena via a range of theoretical frameworks and methodological approaches focusing particularly on individual differences and language development. The volume proposes that teachers in formal learning settings should seek to support and facilitate the development of these identities and

practices and it indicates means they can adopt to best do so      *National Bureau of Standards Miscellaneous Publication*
