Agee ,1974     Fire in Ecosystems of Boreal Eurasia** Johann Georg Goldammer,Valentin Furyaev,2013-03-09 One of the first priority areas among joint East West research programs is the rational use of natural resources and sustainable development of regions In the boreal zone of North America and Eurasia forests are economically very important and at the same time highly vulnerable to disturbances Because of its size and ecological functions the boreal forest zone and its most dynamic disturbance factor fire play an important role in ecosystem processes on global scale Interest within the global change research community in Northern Eurasia Fennoscandia European Russia Siberia and the Far East of Russia has grown dramatically in the last few years It is a vast area about which very little is known It is a region where temperature rise due to anthropogenic climate forcing is predicted to be the greatest and where the consequent feedbacks to the atmosphere are potentially large In addition it is poised to undergo rapid economic development which may lead to large and significant changes to its land cover Much of this interest in Northern Eurasia as in the high latitude regions in general

is centered on its role in the global carbon cycle which is likely to be significantly affected under global change New research initiatives between Western and Eastern countries have been designed to address a series of phenomena problems and management solutions

**on Forests** Yves Bergeron,Sylvie Gauthier,2018-04-13 This book is a printed edition of the Special Issue Fire Regimes Spatial and Temporal Variability and Their Effects on Forests that was published in Forests Between Two Fires Stephen J. Pyne,2015-10-15 From a fire policy of prevention at all costs to today s restored burning Between Two Fires is America s history channeled through the story of wildland fire management Stephen J Pyne tells of a fire revolution that began in the 1960s as a reaction to simple suppression and single agency hegemony and then matured into more enlightened programs of fire management It describes the counterrevolution of the 1980s that stalled the movement the revival of reform after 1994 and the fire scene that has evolved since then Pyne is uniquely qualified to tell America s fire story The author of more than a score of books he has told fire s history in the United States Australia Canada Europe and the Earth overall In his earlier life he spent fifteen seasons with the North Rim Longshots at Grand Canyon National Park In Between Two Fires Pyne recounts how after the Great Fires of 1910 a policy of fire suppression spread from America s founding corps of foresters into a national policy that manifested itself as a costly all out war on fire After fifty years of attempted fire suppression a revolution in thinking led to a more pluralistic strategy for fire s restoration The revolution succeeded in displacing suppression as a sole strategy but it has failed to fully integrate fire and land management and has fallen short of its goals Today the nation s backcountry and increasingly its exurban fringe are threatened by larger and more damaging burns fire agencies are scrambling for funds firefighters continue to die and the country seems unable to come to grips with the fundamentals behind a rising tide of megafires Pyne has once again constructed a history of record that will shape our next century of fire management Between Two Fires is a story of ideas institutions and fires It s America s story told through the nation s flames
