

# A QUICK BREAKDOWN OF SOME HEALTH LITERACY BASICS

**"Literacy" has been used to indicate a basic understanding of a topic.**

- Financial literacy
- Environmental literacy
- Computer literacy

**Health literacy research is overwhelmingly about patients. But some research addresses health literacy as interactions between people (instead of just in a person's head).**

- Patients' family members and friends
- Community members
- Health professionals (occasionally)

**Context has also been receiving attention in health literacy research.**

- The clinical encounter
- How individuals use health literacy skills when they're online
- How people who share a common condition "do" health literacy
- What educational environments might have to do with health literacy

**"Literacy" is also used to refer to a set of skills or capacities. Most often it's reading. Sometimes it's listening and talking.**

- Can a patient read the information given?
- What attention is being paid to the construction of written documents by health systems?
- Is the provider speaking in a way that the patient understands?

**Health literacy means people should know about biomedical subject areas.**

- Medical knowledge
- Scientific knowledge
- Wellness and nutrition

**Health literacy also include knowing about health care systems.**

- The ways organizations work
- What different departments do and how to find them
- How health insurance works

**More than "just the facts," health literacy involves having access to the ways of thinking used by those in the know.**

- "It works this way because..."
- Any insider or expert knowledge
- Savoir-faire about who to talk to

**Health literacy is concerned with specialized language.**

- Medical jargon
- Pharmaceutical product names
- Terms that have one meaning in everyday life, and a different meaning in a specialized context ("critical," "orientation," "floor").

**Health literacy also involves metacognitive processes.**

- Knowing what you know
- Knowing what you don't know
- Knowing where to find out what you don't know, and how to judge its reliability
