Introductory Lessons on Mind Richard Whately, 1868

Coleridge and Emerson Sanja Sostaric, 2003 This work elaborates R W Emerson's modification of S T Coleridge's central philosophical aesthetic notions such as imagination reason genius and symbol Although Kant's and Schelling's idealistic philosophy various pantheistic theories and Neoplatonism are identified as Coleridge's and Emerson's congenial intellectual and spiritual background the author draws yet more attention to subtle differences between the English Romantic Coleridge and the American transcendentalist Emerson which allow us to recognize that we deal with two distinct philosophical and poetic theories The first part concentrates on Coleridge's intellectual development from the eager empiricist disciple to a philosopher dedicated to the impossible enterprise of formulating the unified theory of life which would incorporate Kant's transcendental philosophy pantheism and Christianity Coleridge's letters diary entries and notebook citations reveal a thinker unwilling to sacrifice neither the fervor of his Christian belief nor the poetic potential of pantheistic doctrines to the cool intellectuality of any single philosophic system The outcome of Coleridge's synthesizing effort was thus the Romantic aesthetics which was not a substitute for religion but religion artistically redefined Within this context particular attention has been given to Coleridge's radical adjustment of Kant's differentiation between reason and understanding on the one hand and of the neoclassicist differentiation between imagination and fancy on the other hand to his own needs Coleridge's tendency to use Christian arguments as the cohesive force that would secure the unity of his theory made Coleridge overemphasize the spiritual dimension at the cost of the intellectual and thus facilitate a significant shift in thinking which was responsible for the creative misinterpretation of his theories by the next generation of thinkers in the United States As it is shown James Marsh's publication of Coleridge's *Aids to Reflection* in which Coleridge elaborates his concept of the spiritual religion and of the notion of reason which approximates the inner light theories and nearly erases the Christian balance between the Creator and the Creation plays an exceptionally important role in this process In the second part the author delineates Emerson's transformation from the Unitarian to the transcendentalist and explores in detail to what extent Emerson's formulation of his transcendentalist philosophy derived from his inclination to read Coleridge as a mystic that is to regard Coleridge's Christian bias as a whim which does not essentially affect the core of Coleridge's theory It is shown that Emerson neglecting flatly Coleridge's careful distinctions aimed at preserving the balance between dualism and monism resolves Coleridge's theoretical ambiguity by exclusively concentrating on the part of Coleridge's system which favors the irrational and the unconscious dimension As a

consequence Emerson's philosophy and aesthetics with their emphasis on reason and imagination understood as inspiration that is the inflow of the divine into the mind of the artist represent a radicalized version of Coleridge's neatly suppressed monistic tendencies. In Emerson's interpretation Coleridgean imagination becomes equated with Plotinian soul that is Coleridgean reason becomes a synonym for the utter mystical depersonalization. Finally the delicate and easily overlooked Emersonian shifts with regard to Coleridge's theory point at the significance of Emerson's theoretical solutions in the transition from romanticism to modernism a transition to which ironically enough Coleridge himself unintentionally and indirectly gave valuable contribution

Modernism Lawrence Rainey, 2005-07-15 *Modernism An Anthology* is the most comprehensive anthology of Anglo American modernism ever to be published. Ample represents the giants of modernism: James Joyce, Gertrude Stein, Virginia Woolf, T. S. Eliot, Ezra Pound, Wallace Stevens, Marianne Moore, Samuel Beckett. Includes a generous selection of Continental texts enabling readers to trace modernism's dialogue with the Futurists, the Dadaists, the Surrealists and the Frankfurt School. Supported by helpful annotations and an extensive bibliography. Allows readers to encounter anew the extraordinary revolution in language that transformed the aesthetics of the modern world.

[Towards a Romantic Conception of Nature](#) Hendrik Roelof Rookmaaker, 1984-01-01 This study describes in detail the development of Coleridge's attitude to nature as it is reflected in his poetry. It analyses the different stages of Coleridge's search for a meaningful relation to nature from an uncritical adoption of the eighteenth century conventions in his early poetry to a projectionist view in his poems of 1802. It offers challenging new readings of some of Coleridge's major poems like *The Ancient Mariner* and *Dejection: an Ode* and tries to rehabilitate some minor ones like *The Picture*. Attention is also paid to his relation with Wordsworth. It discusses in detail the philosophical background of Coleridge's views and considers the contribution of German thought to his development. As a whole this study affords a new insight into the genesis of romanticism in England.

Romantic Empiricism Gavin Budge, 2007 *Romantic Empiricism* is a collection of essays by established and emerging scholars which represents a paradigm shift for the study of British Romanticism. The volume challenges the received view that German Idealist philosophy constitutes the main intellectual reference point for British Romantic writers, arguing instead that the tradition of Scottish Common Sense philosophy largely overlooked by literary scholars is a significant influence on Romantic thought. The essays in the collection examine a variety of canonical and non-canonical Romantic authors in the light of this fresh interpretative context ranging from Charlotte Smith and Elizabeth Hamilton to Robert Burns and S. T. Coleridge. The volume is prefaced by a substantial theoretical introduction which sets out the historical and interpretative case for the relevance of Common Sense philosophy for the study of British Romanticism.

"Genial" Perception William C. Edinger, 2022-05-15 *Genial Perception* offers a critical examination of Wordsworth's and Coleridge's naturalist construction of creative and critical perception and a historical study of the

perceptual dimension of poetic taste Genial is the adjectival form of genius and eighteenth century critical naturalism understands genial perception as a gift of nature as an inborn power operating autonomously through the senses and imagination and thus independently of cultural influence By exploring the philology of keywords and binaries inherited by the two poet critics and used to describe and interpret their perceptual experience both creative imaginative and critical Genial Perception traces how that experience reveals an unacknowledged indebtedness to discourse and language having been silently and perhaps unconsciously shaped by patterns and trends in the literary culture in which Wordsworth and Coleridge came of age This study shows that critical perception often thought to be too elusive and subjective to make a proper subject for historical investigation can be approached through study of the terms the language of the practical criticism that attempts to communicate it that both critical and creative perception are far more dependent on language than is commonly recognized and that philology by recovering the original usage functions and contexts of critical keywords provides for an accurate historical understanding of the claims made by critics in the long eighteenth century for genial perception and can illuminate the dynamics of genial perception itself
